1 Stroke

* The length of the band indicates the selectable stroke.
Example) S3 can be selected from 50 ~ 300mm

2 Max. speed (operating speed)

* The maximum speed varies depending on the stroke.
Example) For an S3 lead of 6mm and a stroke of 300mm, the maximum speed would be 150mm/s
* Values in brackets <> are for vertical use.

3 Cycle time

* This is the one-way travel time when the longest stroke is operated at the horizontal mount, maximum speed and maximum acceleration/deceleration.
* Values not at maximum payload.

4 Payload

* The payload varies depending on the acceleration/deceleration and installation position.

1 Stroke

* The length of the band indicates the selectable stroke. Example) R6 can be selected from 50 ~ 300 mm

2 Max. speed (operating speed)

* The maximum speed varies depending on the stroke. Example) For an R6 lead of 12 mm and a stroke of 300 mm, the maximum speed would be 547 mm/s
* Values in brackets < > are for vertical use.

3 Cycle time

* This is the one-way travel time when the longest stroke is operated at the horizontal mount, maximum speed, and maximum acceleration/deceleration. **Values not at maximum payload.**

4 Max. push force

* The push forces listed are only reference values. Please refer to P. 1-269 for details

5 Payload

* **The payload varies depending on the acceleration and installation position.**

Radial Cylinder®

EC-(D)RR Series

Radial Load Specification
Radial Cylinder®

* Optional

With digital speed controller

ELECYLINDER® and external connections

ELECYLINDER® contains a built-in controller.

I/O connection

Use a power I/O cable

2 391

Connect to a field network

Connect ELECYLINDER® only

2 405

REC

Mixed connection with ROBO Cylinder and single axis robot

2 405

RCON

RCON gateway unit
+
RCON-EC

Reading the table and finding reference pages

1 Stroke

Distance

* The length of the band indicates the selectable stroke. Example) RR3 can be selected from 50 ~ 300 mm

2 Max. speed (operating speed)

* The maximum speed varies depending on the stroke. Example) For an RR3 lead of 6 mm and a stroke of 300 mm, the maximum speed would be 150 mm/s

* Values in brackets < > are for vertical use.

3 Cycle time

* This is the one-way travel time when the longest stroke is operated at the horizontal mount, maximum speed, and maximum acceleration/deceleration. Values not at maximum payload.

4 Max. push force

Push force

* The push forces listed are only reference values. Please refer to P. 1-269 for details.

5 Payload

Weight

Horizontal Vertical

* The payload varies depending on the acceleration and installation position.

Reading the table and finding reference pages

1 Stroke

* The length of the band indicates the selectable stroke.
Example) S6□AH can be selected from 50 ~ 800 mm

2 Max. speed (operating speed)

* The maximum speed varies depending on the stroke.
Example) For an S6□AH lead of 20mm and a stroke of 800 mm, the maximum speed would be 560 mm/s
* Values in brackets < > are for vertical use.

3 Cycle time

* This is the one-way travel time when the longest stroke is operated at the horizontal mount, maximum speed, and maximum acceleration/deceleration.
* Values not at maximum payload.

4 Payload

* The payload varies depending on the acceleration/deceleration and installation position.

Type	Lead		Stroke (mm) and max. speed (mm/s)										Payload (kg)		Reference page
	Model	mm	* Length of band = stroke * Numbers in band = Maximum speed by stroke, Numbers in < > are when used vertically.										Horizontal	Vertical	
			50~400	450	500	550	600	650	700	750	800

1 Stroke

* The length of the band indicates the selectable stroke. Example) R6□W can be selected from 50 ~ 300 mm

2 Max. speed (operating speed)

* The maximum speed varies depending on the stroke. Example) For an R6□W lead of 12 mm and a stroke of 300 mm, the maximum speed would be 547 mm/s
* Values in brackets <> are for vertical use.

3 Cycle time

* This is the one-way travel time when the longest stroke is operated at the horizontal mount, maximum speed, and maximum acceleration/ deceleration.
Values not at maximum payload.

4 Max. push force

* The push forces listed are only reference values. Please refer to P. 1-269 for details.

5 Payload

* The payload varies depending on the acceleration and installation position.

Type	Lead		Stroke (mm) and max. speed (mm/s)							Max. push force (N)	Payload (kg)		Reference page

Battery-less absolute encoder specification	WA	2-388	
Wireless communication specification	WL	2-388	
Wireless axis operation specification	WL2	2-388	

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

(Note 2) The clevis bracket (QR or QRPB) and knuckle joint (NJ or NJPB) are sold as a set. The assembly is to be performed by the customer.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) Radial cylinders are equipped with a built-in guide. Please refer to P. 1-295 for details on the radial load applied to rods.
- (3) The value of the horizontal payload assumes that there is an external guide.
- (4) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (5) Duty must be restricted depending on the ambient operating temperature. Please refer to P. 1-280 for details.
- (6) Pay close attention to the installation orientation. Please refer to P. 1-261 for details.

Power / I/O Cable Length

Standard connector cable			
Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)
		CB-EC-PWBIO□□-RB supplied	CB-REC-PWBIO□□-RB supplied

How to Read Product Specification Reference Pages

The product specification reference pages mainly contain the following items.
Please refer to P. 2-78 ~ 79 for detailed information on each item.

7

EC ELECYLINDER

■ EC-DRR6 <with digital speed controller>

*1 When the rod is returning to its home position, be careful of possible interference from surrounding objects, as it will travel until it reaches the M.E.
*2 The direction of width across flats varies depending on the product. Those flats cannot be used for reference plane.

ST: Stroke
M.E: Mechanical end
S.E: Stroke end

Supplied hex nut

Supplied square nut (6 pieces supplied)

Detailed view of P
Base oblong hole details

Cross section of Z-Z
Details of T-slot (dimension B range)

■ Dimensions by stroke

L	Stroke	65	115	165	215	265	315
	Without brake	335.5	385.5	435.5	485.5	535.5	585.5
With brake	375.5	425.5	475.5	525.5	575.5	625.5	
A	217.5	267.5	317.5	367.5	417.5	467.5	
B	177	227	277	327	377	427	
J	100	150	200	250	300	350

Mass (kg)	Stroke	65	115	165	215	265	315
	Without brake	1.8	2.1	2.3	2.6	2.8	3.1
With brake	2.1	2.4	2.6	2.9	3.1	3.4	

8

■ Applicable Controllers
(Note) EC series is equipped with a built-in controller. Please refer to P. 2-391 for details on built-in controllers.

1 Strokes, Options and Cables

Stroke

Lists actuator stroke.

Option

Lists options that can be selected for actuators.

Please see the reference pages listed in the table for descriptions of each option.

Power / I/O Cable

Lists cables for connecting actuator control power and PLC I/O signals.

2 Main Specifications

When selecting an actuator, you will need to check the body rigidity and operation life in addition to operation performance.

3 Table of Payload by Speed/Acceleration

The maximum speed will vary depending on the weight of the transported object.

Please make sure to check that your selected model meets your speed and payload requirements.

If multiple leads satisfy your conditions, either could be selected.

However, a larger lead will provide a higher maximum speed and smaller payload than a smaller lead.

4 Stroke and Max Speed

Longer strokes may cause the maximum speed to decrease due to the resonance of the ball screw. Please make sure to check the "Stroke and Max Speed" table to ensure that your selected model meets your maximum speed requirements.

* Please note that the maximum speed may not be reached if the moving distance is short.

How to Read Product Specification Reference Pages

5 Correlation between Torque and Current Limit

The torque during a push-motion operation can be changed by changing the current limit value of the controller to be between 20% and 70%.

The lower and upper limits of current values that can be set differ depending on the model.

Please refer to the “Correlation between Torque and Current Limit” diagrams on each production specification page for details.

6 Rod Deflection

This graph shows the amount of deflection measured in the rod when a load is applied to the rod tip with the rod placed horizontally.

Since the radial cylinder is equipped with a built-in guide, a certain load can be applied to the rod without external guides.

7 Dimensions

This lists the dimensions for the listed model(s).

The actuator slider, rod, or table position is the position when home return is complete.

It is indicated on the upper right of the drawings whether 2D CAD or 3D CAD data is available (CAD data may be downloaded from the IAI website).

8 Applicable Controllers

EC Series products are equipped with a built-in controller. For details on built-in controllers, please refer to P. 2-291.

Explanation of Model Specification Items

The model names for each series of ELECYLINDER generally contain the following information.

Please refer to the following explanation for details.

The selectable encoder types and selection range (lead, stroke, etc.) vary by model.

Please refer to the pages for each model for details.

ELECYLINDER®

Explanation of item descriptions

(Example)

EC – **DS7S(R)** – **200** – **1** – **B**

① Series ② Type ③ Specification ④ Stroke ⑤ Power / I/O cable length ⑥ Options

① Series

ELECYLINDER® Series

② Type

The type (e.g. slider), body width (e.g. 60 mm wide), and ball screw lead are indicated as follows.

(Example) **DS7S**

Shape Body width Ball screw lead
 ▼ ▼ ▼
 Slider 70mm 24mm

* The ball screw lead (the distance the slider moves when the ball screw turns once) is indicated using a letter. The lead indicated by each letter varies by model. Please refer to each product specification page for details.

Digital speed controller	
Blank	Standard
D	Digital speed controller

Type			
S	Slider	GD	Mini type rod with double guide
WS	Wide slider	TC	Table (compact type)
B	Belt driven	TW	Table (wide type)
R	Rod	GRB	Gripper
RR	Radial cylinder	RTC	Rotary
RP	Mini type rod	ST	Stopper cylinder
GS	Mini type rod with single guide		

Body width			
3	Approx. 30 mm	9	Approx. 90 mm

M
H
S

③ Specification

The type (slider, rod, etc.), rigidity, motor coupling method (side-mounted), and environment (clean room, waterproof) are indicated as follows.

Blank	Slider type, rod type, radial cylinder type, table type	AH	High rigidity slider type, high rigidity radial cylinder type	R	Side-mounted motor specification	CR	Clean room specification	W	Waterproof type
-------	---	----	---	---	----------------------------------	----	--------------------------	---	-----------------

④ Stroke

Indicates the actuator stroke (operation range) (unit: mm).

⑤ Power / I/O cable length

This is for the cable used to connect power and PLC I/O signals.

This indicates the cable length (1 to 10 m) or indicates whether only a connector is supplied.

■ Standard connector cable

0	Terminal block connector supplied
1	Power / I/O cable length specification: 1 m
:	:
10	Power / I/O cable length specification: 10 m

■ Four-way connector cable

S1	Power / I/O cable length specification: 1 m
:	:
S10	Power / I/O cable length specification: 10 m

* The motor power cable length can also be selected for S10, S13 and S15. Refer to "Model Specification Items" on each product specification page for details.

* Supplied cables will vary depending on whether the RCON-EC connection specification (ACR) is selected. Refer to P. 2-396 and 2-404 for details.

⑥ Options

Indicates options installed to the actuator.

Blank	Incremental encoder specification NPN specification, no options
AC5	Actuator cable length: 5 m
ACF2/ACF5	Actuator cable length change 2 m/5 m (fluoro-rubber covering specification)
ACR	RCON-EC connection specification
B	Brake
CS	Air cylinder interchangeable mounting plate
DL	Mount orientation of digital speed controller (left side)
DR	Mount orientation of digital speed controller (right side)
FFA	Tip adapter (flange)
FL	Flange (front)
FST	Cable fixing bracket (front side)
FT	Foot bracket (bolting from top)
G1/G5	Designated grease specification
GT2	Guide right mount / table right mount
GT3	Guide bottom mount / table bottom mount

GT4	Guide left mount / table left mount
ML	Motor side-mounted to left (standard)
MR	Motor side-mounted to right
MOB	Motor mounting direction changed (bottom)
MOL	Motor mounting direction changed (left)
MOR	Motor mounting direction changed (right)
MOT	Motor mounting direction changed (top)
NFA	Tip adapter (internal thread)
NJ	Knuckle joint
NJPB	Knuckle joint + oscillation receiving bracket
NM	Non-motor end specification

PN	PNP specification
QR	Clevis bracket
QRPB	Clevis bracket + oscillation receiving bracket
SA	Shaft adapter
SLF	Fluoro-rubber seal specification
SR	Slider part roller specification
TA	Table adapter
TMD2	Split motor and controller power supply specification
TST	Cable fixing bracket (upper side)
VR	Suction joint on the opposite side
W	Double slider specification
WA	Battery-less absolute encoder specification
WL	Wireless communication specification
WL2	Wireless axis operation specification

Precautions

Please be sure to read these Safety Precautions carefully before selecting a model or using a product, to ensure the proper use of the product.

The cautions listed below are meant to ensure that the product is used safely and correctly, and to prevent injury to the user, injury to others, and damage to property.

Make sure also to comply with JIS B 8433 (Manipulating industrial robots - Safety) safety regulations.

Designated items are classified into one of several danger levels based on the degree of injury or harm they could cause:

"Danger," "Warning," "Caution," and "Request."

 Danger	This indicates a hazardous situation where improper handling would result in danger leading to death or serious injury.
 Warning	This indicates a situation where improper handling could result in death or serious injury.
 Caution	This indicates a situation where improper handling could result in injury or property damage.
 Request	This does not indicate any possibility of injury, but indicates an instruction that should be followed to ensure the product is used appropriately.

Products are designed and manufactured as general industrial machine parts.

Products must be handled by someone with sufficient knowledge and experience (such as the system designer or other individual responsible for selecting and handling the device), only after that individual has read the "Catalog" and "Instruction Manual" (specifically, the included "Safety Guide"). It is dangerous to handle products incorrectly.

Make sure to read the instruction manuals for all devices that will be used, such as the product itself and controller.

It is the customer's responsibility to use a product only after verifying and determining that the product is compatible with applicable systems.

After reading the "Catalog" and "Instruction Manual," store them in a safe place so that the individual using the product can refer to them at any time.

If transferring ownership or lending a product to someone else, be sure to attach the applicable "Catalog" and "Instruction Manual" to the product itself in such a way that it is noticeable, to ensure that the product is used safely and correctly by the new owner/user.

The danger/warning/caution items listed in this section do not cover all situations. Make sure to read the "Catalog" and "Instruction Manual" for each individual device to ensure that it is handled safely and correctly.

Danger

General

- Do not use for the following applications.
 1. Medical instruments used to maintain, control, or otherwise affect human life or physical health
 2. Mechanisms and machinery designed for the purpose of moving or transporting people
 3. Machinery components essential for safety

These products are not planned or designed for applications requiring an especially high level of safety. These products cannot guarantee safety in applications involving risk to human life.

Warranties apply only to the product that is delivered.

Installation

- Do not use in locations with dangerous substances such as incendiary, ignitable, or explosive materials. Doing so could cause a fire, ignition, or explosion. Install safety measures (such as a safety fence) to prevent individuals from entering the mobile range of the robot during operation or when the robot is in a state where it could operate. Making contact with the robot during operation could cause death or serious injury.
- When installing a product, make sure to use reliable supports and mounts (including for the part). If the product tips over, falls, or otherwise operates abnormally, it could result in injury or could damage the product or part.
- Avoid use in locations where the product itself or controller will be exposed to liquids such as water or oil droplets.
- Never cut and reconnect a cable to extend or shorten the product cabling. Doing so could cause a fire.

Operation

- Do not enter the mobile range of the machine when operating the product or when the product is in a state where it could operate. The actuator could move or otherwise operate suddenly, resulting in injury.
- Individuals with pacemakers or other similar medical devices must stay at least 1 meter away from the product (at least 30 cm for linear servo actuators). Products contain powerful magnets that could cause pacemakers to malfunction.
- Only splash-proof specification products may be exposed to water. Exposing a product to water, cleaning it, or using it in water could cause a malfunction, which could cause an accident such as injury, electric shock, or a fire.

Maintenance, inspection, repair

- Never modify the product. Doing so could cause a malfunction, which could cause an accident such as injury, electric shock, or a fire.
- Do not disassemble or assemble the product inappropriately with regard to its basic structure, performance, or functions. Doing so could cause an accident such as injury, electric shock, or a fire.

Warning
General

- Do not use outside of the product specifications. Use outside of specifications could cause product failure, function stoppage, or damage. It could also drastically reduce operation life. Be especially careful to operate within the maximum weight, maximum speed, and maximum acceleration/deceleration.

Installation

- Design a safety circuit or safety measures to prevent damage to the system or an accident resulting in injury or death if the machine stops during a system malfunction (such as an emergency stop or power outage).
- Be sure to install class D grounding (formerly referred to as class 3 grounding, with grounding resistance of 100 Ω or less) on actuators and controllers, in order to prevent electric shock, prevent electrostatic charging, improve noise resistance performance, and suppress unnecessary electromagnetic radiation. Electrical leaks could cause electric shock or a malfunction.
- Be sure to confirm safety within the operation range of the device prior to supplying power to the product or operating it. Supplying power suddenly could result in electric shock or injury caused by contact with moving parts.
- When wiring the product, refer to the "Instruction Manual" to ensure wiring is connected correctly. Ensure that cables and connectors are connected tightly without any looseness. Otherwise, the product could malfunction and cause a fire.

Operation

- Do not touch the terminal block or any of the setting switches with the power turned on. Doing so could cause electric shock or a malfunction.
- When moving the moving parts of the product by hand (such as during manual positioning), first confirm that the servo is turned off (using the teaching pendant). Doing otherwise may cause injury.
- Do not damage the cables. Damaging cables, bending them excessively, pulling them, wrapping them, placing them under heavy objects, or stuffing them into narrow spaces could result in electrical leaking or conduction defects, which could cause accidents such as fire, electric shock, or a malfunction.
- Turn the power off during power outages. Otherwise, the product could start suddenly when power is restored, resulting in injury or damage to the product. Implement some means of preventing parts from being dropped in such a situation.
- If the product is generating abnormal heat, smoke, or odors, turn the power off immediately. Continuing use could damage the product or cause a fire.
- If the product is making abnormal noises or vibrates excessively, stop operation immediately. Continuing use could damage the product or cause a malfunction or other accident resulting in injury.
- If a product protection system (alarm) operates, turn the power off immediately. Otherwise, the product could malfunction and cause injury, the product could be damaged, or injury may occur. After turning the power off, investigate the cause of the issue, resolve the issue, and then turn the power back on.
- If the product LEDs do not turn on even after turning the power on, turn the power off immediately.
- Do not climb on the product, stand on it, or place objects on it. Doing so could cause the product to tip over or fall and cause injury, the product could be damaged, or the product could malfunction and cause injury.
- Do not use if parameters related to motor output, maximum speed, maximum acceleration/deceleration, or encoder pulses have been modified. Doing so could damage actuator components.

Maintenance, inspection, repair

- Make sure to completely shut down power supplied to the product prior to performing a maintenance inspection, servicing the product, or replacing parts. Follow the instructions below when doing this work.
 1. Post a sign ("Work in progress, do not turn power on") or other indication in a highly visible area while working, to ensure that someone does not inadvertently turn the power on.
 2. When multiple workers are performing a maintenance inspection, first clarify who is the main worker and who are the assistants. When turning the power on and off or moving an axis, always call out to indicate what is being done and check for safety.

Disposal

- Do not throw the product into a fire. The product could crack and release toxic gas.

Precautions

Caution

Installation

- Do not use in locations exposed to radiant heat from large heat sources, or in locations with an ambient temperature outside of the range of 0 to 40°C. Doing so could reduce the operation life of the product.
- Do not use in locations exposed to direct sunlight (ultraviolet light), salty environments, highly humid environments, or in environments that contain organic solvents or phosphate ester-based hydraulic oils. Doing so could result in short-term loss of functionality or could cause a sudden reduction in performance or reduction to operation life. It could also cause the product to malfunction.
- Do not use in environments containing corrosive gases or similar substances (such as sulfuric acid or hydrochloric acid). Doing so could create rust, which could cause significant deterioration.
- Provide sufficient shielding measures during use in the following locations. Doing otherwise could result in malfunction.
 1. Locations subject to high currents or strong magnetic fields
 2. Welding stations and other locations subject to arc discharge
 3. Locations in which noise is generated due to static electricity, etc.
 4. Locations which could be exposed to radiation
- Install the product body and controller in a location with minimal dirt and dust that is free from iron powder. Installing in a dirty or dusty location, or in a location with iron powder, could cause a malfunction.
- Do not install in locations subject to major vibration or shocks (4.9 m/s² or greater). Major vibration or shocks could cause a malfunction.
- Install an emergency stop system in an easily accessible location so that the product can be stopped immediately if there is a risk of danger. Doing otherwise may cause injury.
- Install the product so that there is sufficient space to perform maintenance work. If not enough space is provided, it could prevent work such as daily inspections and maintenance from being performed, which could result in system stoppages, damage to the product, or injury while working.
- When transporting or installing the product, use caution to ensure the safety of workers, such as using reliable lifts and supports or having this work performed by multiple individuals.
- When using a crane or other similar equipment, never attach a load that exceeds the rated load of the equipment.
- Use hoisting accessories that are appropriate for the load. Ensure that the cutting load and other parameters of hoisting accessories are safe. Confirm that hoisting accessories are not damaged.
- Do not hold the product by its moving parts or cables when installing it. Doing so may cause injury.
- Use only genuine IAI cables between actuators and controllers. Use only genuine IAI parts for components such as actuators, controllers, and teaching tools.
- The braking mechanism is meant to prevent parts such as the slider and rod from dropping when the vertical axis is turned off. Do not use it as a safety brake or for any other purpose (for braking).
- When performing work such as installation and adjustment, display a sign ("Work in progress, do not turn power on") or other indication to ensure that the power is not inadvertently turned on. If the power is inadvertently turned on, the actuator could operate suddenly and cause injury.

Operation

- When turning the power on, do so in order from higher devices downward. Otherwise, the product could start suddenly, resulting in injury or damage to the product.
- Do not insert your fingers or any objects into the openings on the product. Doing so may cause fire, electric shock, or injury.
- Do not bring magnetic media such as magnetic cards within 1 meter of the product. Internal magnets may erase data stored on the magnetic card.

Maintenance, inspection, repair

- Wear protective glasses when adding grease to actuators. Grease could fly off and enter your eyes, causing inflammation.
- If any grease enters your eyes, immediately seek appropriate treatment from a doctor.
- When turning the power off and opening the product to replace the battery or perform a similar task, do not touch any terminals connected to capacitors in the product (for 30 seconds) after turning the power off. Doing so may result in electric shock due to residual voltage.
- When performing an insulation resistance test, do not touch the terminals. Doing so may result in electric shock. (Do not perform dielectric strength voltage tests on products that use DC power.)

Request

General

- If you are considering using this product under conditions or in an environment not listed in the "Catalog" or "Instruction Manual," or for an application that requires a specific level of safety such as aviation facilities, combustion equipment, amusement machines, operation in a clean-room, safety devices, or other situations that could have a significant impact on human life or property, carefully consider whether product ratings and performance are sufficient for the application, as well as appropriate safety measures such as fail-safes. Make sure to contact an IAI sales representative for confirmation.

! Request

Installation

- Do not place any obstructions around the controller that could prevent ventilation. Doing so may damage the controller.
- When using the product installed vertically, ensure that it used with a brake.
- Use a protective cover or similar means to isolate the moving parts of the machinery and equipment to prevent direct contact with the human body.
- Do not configure controls that would cause the part to drop during a power outage. Configure controls that prevent parts such as the slider, rod, and part from dropping when there is a power outage or the machinery and system are stopped in an emergency.
- Take the following instructions into consideration to improve the straightforward accuracy of parts such as the slider and table, and to ensure that the ball screw and linear guide operate smoothly.
 1. Process the installation surface of the product body to within a flatness of 0.05 mm.
 2. Ensure that the installation surface will provide sufficient actuator rigidity.
- Select an environment that meets the following conditions to install the actuator/controller.
 - Must not be exposed to direct sunlight.
 - The machine body must not be exposed to radiant heat from a large heat source such as a heat-treating furnace.
 - Ambient temperature of 0 to 40°C.
 - Humidity of 85% or less with no condensation.
 - No corrosive gas or combustible gas.
 - Must be a standard assembly work environment with minimal dirt and dust. (Does not apply to dust-proof/splash-proof specification products.)
 - Must not be exposed to oil mist or cutting fluid.
 - Must be free from excessive electromagnetic waves, ultraviolet light, and radiation.
 - These products were not designed with chemical resistance in mind.

The installation environment must be one in which workers can generally work without protective gear or protective clothing.
- Do not remove the manufacturing number sticker attached to the product. You will need this information when contacting IAI.

Storage

- Ensure that no condensation will occur during long term storage. Condensation could create rust which could cause a malfunction.
- Although the product can withstand storage temperatures up to 60°C over a short period of time, it can only be stored in temperatures up to 50°C when stored for one month or longer. Changes in the composition of grease could cause a malfunction or reduce the operation life of the product.
- Store the product horizontal on a flat surface. When storing it boxed, follow any orientation indications provided. Otherwise, the product shape may deform.

Installation, operation, maintenance

- When handling the product, wear protective gear such as protective gloves, protective glasses, and safety shoes as required, to ensure safety.
- When performing maintenance, use only specified grease on ball screws. Be especially cautious of mixing fluorine-based and lithium-based grease, as this may reduce the functionality of the grease and could damage machinery.
- Actuators must be lubricated to function sufficiently. Insufficient lubrication can increase wear around rolling parts and could cause premature damage. Lubricate regularly based on the following guidelines.
Grease lubrication guidelines
 - These guidelines assume 8 hours of operation per day.
 - Lubricate more often if used in a high workload environment, such as continuous operation during the day and night.
 - Lubricate when the operation distance or number of operation months is reached, whichever is sooner.

Usage speed (mm/sec)	Lubrication guidelines	
	Operation distance	Number of months
From more than 0 to 750	1,250km	12 months
From more than 750 to 1500	2,500km	

(Note) The values above will vary depending on the actuator. Refer to the instruction manual for details.

Warranty

- The warranty period lasts until either of the following is reached, whichever is sooner.
 - 18 months after shipment from IAI
 - 12 months after delivery to the specified location
 - 2500 operation hours

Any failures that occur under appropriate usage conditions during this period or any failures that are clearly the responsibility of IAI will be repaired at no charge. However, this warranty does not cover issues caused through use under conditions or in environments not described in the catalog/instruction manual. This warranty covers only the product supplied by IAI, and any ancillary damage caused by failures in supplied products is not covered by this warranty. Repairs will be performed on-site. Refer to the instruction manual for details.

Disposal

- If the product can no longer be used or will no longer be used, dispose of it properly as industrial waste.

Product Handling Precautions

Precautions

Wireless axis operation precautions

Touch Panel Teaching Pendant TB-03 (V2.30 or later) can be used to operate **ELECYLINDER®** (optional model: WL2) wirelessly.

When doing so, confirm safety as described below before use.

- When connected wirelessly, **the stop switch of this system will not work**. Prepare a device/circuit to stop the system if an emergency stop is required.

- **ELECYLINDER®** operation tests (forward end/backward end movement, jog, and inching) can be conducted during wireless **ELECYLINDER®** operation. **This function is not meant to perform automatic operation**. Construct the machine system based on the risks in the usage environment.
- **Conduct a risk assessment based on the requirement standards for the embedded machine.** Dangerous operations, such as having to automatically stop when control signals are not received (including situations where communication is interrupted) are not permitted.
- Stop operations performed via wireless axis operation cannot be used as safety functions according to EN ISO 13849-1:2015. They also are not compatible with Safety Category B or 1 to 4 in EN ISO 13849-1:2015.

Precautions when installing and operating a digital speed controller

Digital speed controller ("DS" hereafter) operation assumes that setup changes will be performed ① during equipment start-up or ② during system operation, and also assumes that work will be done within a safety fence. A worker could become injured if part of his or her body touches a moving part or transported object.

Follow the precautions below when operating a DS during use.

1. Identify the operation range to prevent anyone from touching a moving part or transported object, and allow only workers who have received safety training (in Japan, special training as defined by safety and hygiene regulations) to operate.
2. If a wired/wireless teaching pendant or PC is connected, "Tool connected" will be displayed on the DS display screen and you will no longer be able to operate the DS.
When confirming the display, identify the operation range and stand a sufficient distance away to ensure that part of your body does not touch a moving part or transported object.
3. Before operating, stand away from the DS operation area, moving parts, and transported objects, setup a light curtain or other type of area sensor, and confirm that parts of your body such as your fingers or hands will not be pulled in.
4. The DS is set to a low speed of 250 mm/s or less when shipped to ensure safe operation. If the speed will be set higher than 250 mm/s, keep safety in mind and increase the set speed one level at a time while confirming operation.
5. Perform work with at least two people, including a supervisor other than the DS operator.
Construct an appropriate safety circuit and install an emergency stop button and enable switch with three positions. In the case of an emergency, the supervisor should stop the equipment from operating and confirm that the operator is safe.
6. Construct a safety circuit to ensure that it cannot be started simply by having the power turned on or recovering from a power outage.

Precautions when installing and operating a digital speed controller

7. Install actuators with a DS in locations that are accessible and visible, so that an awkward stance is not required when operating the DS. Doing otherwise could cause lower back, neck, or wrist injury.
 8. Confirm that the safety circuit and DS itself are operating normally before beginning to operate the DS. If there is anything out of the ordinary, take appropriate actions before operating it.
 9. Create "work standards" required to ensure safety, and allow operation only by those who have received training based on these standards and who understand these standards (i.e. workers who have received safety training).
 10. When working within a safety fence, make sure to post a sign ("Work in progress within safety fence") in a location where it is visible from outside the safety fence.
 11. Wear a helmet, protective gloves, protective glasses, and safety shoes as required, to ensure safety.
 12. Conduct a risk assessment and take measures to reduce the level of risk to a permissible level.
- The precautions above are for when installing and operating a DS. These are also non-DS general precautions, and they may overlap with "IAI Product Safety Precautions."

Other

- IAI is not to be held responsible if all Safety Precautions are not followed.
- Please contact your nearest IAI sales office for any inquiries on products or repair requests.

Product Handling Precautions[All Models]

Contents

1. Speed	2-89
2. Acceleration/deceleration	2-89
3. Duty ratio	2-90
4. Home	2-90
5. Encoder type	2-90
6. Number of encoder pulses	2-90
7. Motor	2-90
8. Mounting orientation	2-90
9. Positioning repeatability/lost motion	2-91
10. Static allowable moment/dynamic allowable moment	2-91
11. Overhang load length	2-91
12. Operation life	2-91
13. Precision of the main body	2-92
14. Rod types (rod tip runout)	2-92
15. Vertical usage	2-92
16. Splash-proof specification actuators	2-92
17. Compliance with overseas standards	2-92
18. Handling precautions for wireless connections	2-92

1. Speed

Speed refers to the speed set when moving the slider (or rod, arm, or output shaft) on the actuator. The slider accelerates from a stationary state until the set speed is reached. Once the desired speed is reached, the slider will continue at that rate until immediately before reaching the target position (specified position), where the slider will then decelerate to a stop.

Important notes

- ① The maximum speed for stepper motor mounted models (all models other than EC-S13/S13X/S15/S15X) will vary depending on the weight of the transported object.
When selecting a model, please refer to "Correlation Diagrams of Speed and Payload" (found on the reference page for each model).
- ② If moving a short distance, the product may not reach the set speed. This is true for axes with short strokes as well as axes with long strokes.
- ③ Longer strokes may cause the maximum speed to decrease due to the critical rotational speed. For details, please refer to the "Stroke and Max Speed" table on the reference page for each model.
- ④ Belt types (EC-(D)B6/(D)B7) may cause vibration or resonance during low-speed operation. These products should only be used at a speed of 100 mm/sec or greater.
- ⑤ When calculating the movement time, you will need to consider the time for acceleration, deceleration, and convergence in addition to the movement time for the set speed. The detailed movement time can be calculated using the Cycle Time Calculator software. (The Cycle Time Calculator software can be downloaded from: <http://www.iai-robot.co.jp/download>).

2. Acceleration/deceleration

Acceleration refers to the rate at which the speed increases from a stationary state until the set speed is reached. Deceleration refers to the rate at which the speed decreases from the set speed until the part comes to a stop. Both are specified as "G" in programs (1G≈9807 mm/s²).

* For rotaries, 1G≈9807 deg/s²

Important notes

- Increasing the acceleration (deceleration) value will result in faster acceleration (deceleration) and a shorter movement time. However, be sure to set the value to the acceleration/deceleration that matches the payload or lower.
- Please refer to the reference page of each model for the rated acceleration (deceleration).

3. Duty ratio

Duty ratio is the percentage of the actuator's active operation time in each cycle. If the duty ratio is too high for the load on the actuator, the speed, or the acceleration, it could cause an overload error. The product should only be used within the duty ratio range based on the conditions of use.

$$\text{Duty ratio} = \frac{\text{Operating time}}{\text{Operating time} + \text{stationary time}} \%$$

The duty ratio for each ELECYLINDER® type is limited. Please refer to P. 1-280 for details.

4. Home

Home refers to a coordinate reference point used when positioning. If the home is misaligned, the position will also be misaligned an equivalent amount.

Important notes

- ① During home return motion, the moving part moves until it reaches the mechanical end (or stopper for a rotary) before reversing its direction. Please take caution and prevent contact from any surrounding objects.
- ② The reference for the home is on the motor side (the opening side for a gripper or the left rotation side looking from above for the output shaft). The home can also be reversed (non-motor side) as an option. However, please note that you may need to return the product to IAI for adjustment to change the home direction after delivery.
- ③ Please note that "non-motor end specification" can only be selected for models with "non-motor end specification" (code NM) as an option. This specification cannot be selected for other models.
- ④ The home for the home return motion is determined with the mechanical end as reference. It could therefore become misaligned by an amount equal to the distance obstructed from the mechanical end, if the operation cannot be performed due to some external factor during home return motion.

5. Encoder type

There are two types of encoders installed in actuators.

- **Incremental type** This type of encoder does not retain home position data and therefore must perform a home return motion each time it is turned on.
- **Battery-less absolute type** A battery-less absolute encoder (patent applied) retains home position data even if the power is turned off, so there is no need to perform a home return motion when turning the power on. This type of encoder also does not require any battery to retain home position data.

6. Number of encoder pulses

The number of encoder pulses will vary depending on the actuator. Refer to the following table for the pulse count for each actuator.

Series	Type	Number of encoder pulses
EC	S10, S10X, S13/S13X/S15/S15X	16384
	Other models	800

7. Motor

Series	Type	Mounted motor
EC	S10, S10X, S13/S13X/S15/S15X	200 VAC servo motor
	Other models	Stepper motor

Important notes

Stepper motors may cause vibration when the servo is first turned on after turning the power on.

8. Mounting orientation

The mounting orientation varies depending on the model.

9. Positioning repeatability/lost motion

Positioning repeatability refers to the accuracy of repeated movements to a predetermined position. This is not the same as "absolute positioning accuracy."

<Positioning repeatability>

Variation in stop position accuracy when positioning is performed repeatedly from the same point in the same direction.

<Absolute positioning accuracy>

The difference between the coordinate value and actual measurement when positioning is performed at a given positioning point specified as a coordinate value.

Important notes

The accuracy of "positioning repeatability" is not guaranteed under the following conditions.

- ① The power is shut down while repeating an operation, and then the home is reacquired.
- ② The ambient temperature changes drastically.
- ③ The temperature of the actuator body changes.
- ④ The load conditions change during operation.

10. Static allowable moment/dynamic allowable moment (M_a , M_b , M_c)

Static allowable moment is the value of the temporarily allowable moment while the actuator is stopped. Dynamic allowable moment is the value of the allowable moment when the operation life of the actuator is set to 5,000 km or 10,000 km*.

Please refer to Reference Data on P. 1-243 for details.

* The set operation life varies depending on the model. Please refer to the reference page of each model for details.

<Slider type moment direction>

<Table type moment direction>

11. Overhang load length (ℓ)

This is the approximate offset at which the actuator can operate smoothly even when the part or bracket is offset from the slider. Vibration or other factors could cause failure if the approximate length is greatly exceeded. The product should therefore be used within the approximate length. Please refer to the reference page of each model for detailed figures.

12. Operation life

The operation life of an actuator is the same as the operation life of its component parts (such as the guide, ball screw, and motor). The operation life of a part will vary drastically depending on its usage conditions. For example, a guide will have a certain set allowable dynamic load moment (see P. 1-243). If this guide is used with a moment half that of the allowable dynamic load moment, the operation life will increase eight times over the set operation life.

If used well within its usage conditions, a product could continue to be used for 10 years or longer. We therefore recommend selecting a model that is well within your requirements.

13. Precision of the main body

The precision of the main body of the slider type is shown below. The side and the bottom surfaces of the main body are reference surfaces for slider travels. They can be used for a reference of parallelization during installation.

Parallelization of the installed frame (when mounted on the smooth surface*)
Less than 0.05mm/m for all models

Conditions: * The above values are based on 20°C.
* In case the actuator is installed with its reference surface pushed against the base reference surface.
* Refer to the operation manual of the actuator for details.
*1: Degree of parallelization 0.05 mm or less

14. Rod types (rod tip runout)

Guideless rod types do not consider rod tip runout and withstand load (the rod non-rotation precision listed in the actuator specification is the factory default value, so the guide amount will increase with motion). If you need to limit the amount of rod runout, require a certain level of rod non-rotational precision, or if force will be applied from a direction other than straight forward, either use a guided type or use the product with an external guide.

Guided rod type: (D)RR/(D)RR□AH/(D)RR□X□AH

Important notes We recommend using a floating joint to secure the product to a radial cylinder type external guide, and a rigid for guideless rod types (rotation stop rod types). Please refer to "Notes on use with rod type guides" on P. 1-246 for details.

15. Vertical usage

If you will be using an actuator mounted vertically, be sure to specify a brake (option) to prevent the moving parts from dropping and damaging the equipment when the power is turned off or stopped during an emergency. However, please note that moving parts will not operate unless a brake release signal is input and the brake is released for types with brakes.

16. Splash-proof specification actuators

The interface box is not dust-proof/splash-proof. It should be installed away from water.

17. Compliance with overseas standards

Please refer to "RoHS Directive/CE Mark/UL Overseas standards table" on P. 1-353 for products that comply with overseas standards. Products that comply with overseas standards are also indicated with an icon on the reference page of each model for reference.

<Overseas standard icons>

18. Handling precautions for wireless connections

The touch panel teaching pendant (V2.30 or later) can be used to operate ELECYLINDER® (optional model: WL2) wirelessly.

- This product uses radio waves in the 2.4 GHz band (wireless frequency from 2,400 to 2483.5 MHz, wireless output of +5 dBm), called the ISM band.
- This frequency band is also used by a wide range of devices including microwave ovens and wireless LAN devices, which may block radio waves and prevent communication.
- Use of this product is permitted only in the following countries (regions). Use in other countries (regions) requires obtaining permission based on the laws and regulations of the applicable country (region):
Japan, USA, Canada, member countries of the EU, China, South Korea, Thailand, Mexico

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Be sure to enter a code in the "Options" field in "Model Specification Items."

POINT Selection Notes

- The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- Pay close attention to the installation orientation.
- Reference value of the overhang load length is under 100mm in the Ma, Mb, and Mc directions.
- The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.

Power / I/O Cable Length

100	○	○	300	○	○
150	○	○	350	○	○
200	○	○	400	○	○

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Specified grease specification (Note 2)	G1/G5	2-381
Foot bracket	FT	2-377
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Slider part roller specification (Note 3)	SR	2-386
split motor and controller power supply specification	TMD2	2-387
Double slider specification (Note 2) (Note 3) (Note 4)	W	2-111
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

- (Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
- (Note 2) Double slider specification (W) and specified grease specification (G1/G5) cannot be used together.
- (Note 3) When the slider part roller specification (SR) and double slider specification (W) are used together, the price for the slider part roller specification (SR) becomes double.
- (Note 4) There are some non-selectable leads. See P. 2-111 for details.

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (3) Duty must be restricted depending on the ambient operating temperature.
- (4) Pay close attention to the installation orientation.
- (5) Reference value of the overhang load length is under 220mm (under 440mm for double slider specification) in the direction of Ma, Mb and Mc.
- (6) The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, operating conditions should be moderated if some abnormal vibration or noise is observed.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 6) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 5)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

- (Note 5) Only terminal block connector is supplied. Please refer to P. 2-394 for details.
- (Note 6) If RCON-EC connection specification (ACR) is selected as an option.
- (Note) The robot cable is standard.

Four-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 7) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied
S1 ~ S3	1 ~ 3m	○	○
S4 ~ S5	4 ~ 5m	○	○
S6 ~ S7	6 ~ 7m	○	○
S8 ~ S10	8 ~ 10m	○	○

- (Note 7) If RCON-EC connection specification (ACR) is selected as an option.
- (Note) The robot cable is standard.

		Min. speed (mm/s)	—	8	4
		Rated acceleration/deceleration (G)	—	0.3	0.3
		Max. acceleration/deceleration (G)	—	0.5	0.5
		Max. push speed (mm/s)	20	20	20
Brake	Stroke	Max. push force (N)	20	20	20
		Max. push speed (mm/s)	20	20	20
Stroke	Brake	Brake specification	Non-excitation actuating solenoid brake		
		Brake holding force (kgf)	2.5	6	12.5
		Min. nominal stroke (mm)	200	200	200
		Min. effective stroke (mm)	50	50	50
		Max. nominal stroke (mm)	400	400	400
Push	Stroke	Max. effective stroke (mm)	250	250	250
		Stroke pitch (mm)	50	50	50

(Note) Nominal stroke: Stroke shown in the model number.
Effective stroke: Stroke available for actual operation.
(Note) Lead 12 cannot be mounted vertically.

Slider type moment direction

Item	Description
Driving system	Ball screw, φ10mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated aluminum extruded material (A6063SS-T5 equivalent), black alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 364N-m
	Mb: 520N-m
	Mc: 129N-m
Dynamic allowable moment (Note 9)	Ma: 106N-m
	Mb: 152N-m
	Mc: 37.9N-m
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□42)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 9) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions. Confirm the operation life on P. 1-244.

Table of Payload by Speed/Acceleration (double slider specification)

Energy-saving setting disabled (The unit for payload is kg. If blank, operation is not possible.)

Lead 12

PNP specification	PN	2-384	
Slider part roller specification (Note 3)	SR	2-386	
split motor and controller power supply specification	TMD2	2-387	
Double slider specification (Note 2) (Note 3) (Note 4)	W	2-117	
Battery-less absolute encoder specification	WA	2-388	
Wireless communication specification	WL	2-388	
Wireless axis operation specification	WL2	2-388	

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Double slider specification (W) and specified grease specification (G1/G5) cannot be used together.
 (Note 3) When the slider part roller specification (SR) and double slider specification (W) are used together, the price for the slider part roller specification (SR) becomes double.
 (Note 4) There are some non-selectable leads. See P. 2-117 for details.

POINT Selection Notes

- The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- Duty must be restricted depending on the ambient operating temperature.
- Pay close attention to the installation orientation.
- Reference value of the overhang load length is under 280mm (under 560mm for double slider specification) in the direction of Ma, Mb and Mc.
- The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, operating conditions should be moderated if some abnormal vibration or noise is observed.

Stroke	Max. stroke (mm)	500	500	500	500	
	Stroke pitch (mm)	50	50	50	50	

Item	Description
Driving system	Ball screw, φ12mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated aluminum extruded material (A6063S5-T5 equivalent), black alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 79.7N·m
	Mb: 114N·m
	Mc: 157N·m
Dynamic allowable moment (Note 8)	Ma: 17.7N·m
	Mb: 25.3N·m
	Mc: 34.9N·m
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□56)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 8) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Specified grease specification (Note 2) (Note 3)	G1/G5	2-381
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Slider part roller specification (Note 4)	SR	2-386
split motor and controller power supply specification	TMD2	2-387
Double slider specification (Note 3) (Note 4) (Note 5)	W	2-123
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) The maximum speed and payload of the specified grease specification (G1) option are the same as the speed and payload by acceleration/deceleration of the clean room specification.
 (Note 3) Double slider specification (W) and specified grease specification (G1/G5) cannot be used together.
 (Note 4) When the slider part roller specification (SR) and Double slider specification (W) are used together, the price for the slider part roller specification (SR) becomes double.
 (Note 5) There are some non-selectable leads. See P. 2-123 for details.

POINT Selection Notes

- The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- Duty must be restricted depending on the ambient operating temperature.
- Pay close attention to the installation orientation.
- Reference value of the overhang load length is under 300mm (under 600mm for double slider specification) in the direction of Ma, Mb and Mc.
- The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, operating conditions should be moderated if some abnormal vibration or noise is observed.

Cable code	Cable length	User wiring specification (flying leads)	
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 6)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

(Note 6) Only terminal block connector is supplied. Please refer to P. 2-394 for details.
 (Note 7) If RCON-EC connection specification (ACR) is selected as an option, the robot cable is standard.

Cable code	Cable length	User wiring specification (flying leads)	
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied

3	Disabled	225 <200>	205 <200>	170	145	125	110	95	85	70
	Enabled	170	145	125	110	95	85	70		

(Note) Values in brackets < > are for vertical use.
(Note) Nominal stroke: Stroke shown in the model number.
Effective stroke: Stroke available for actual operation.

(Unit: mm/s)

Correlation between Torque and Current Limit (double slider specification)

(Note) Same values as single slider specification.

■ Dimensions (double slider specification)

CAD drawings can be downloaded from our website.
www.intelligentactuator.com

■ EC-(D)S6□AH (double slider specification)

(Note) When the slider is returning to its home position, be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
 (Note) External view of the motor differs for product with a digital speed controller.
 Refer to the external view for single slider with digital speed controller for details.
 (Note) Connect the slider according to the slider cover span or distance between reamed holes shown in the drawing.

EC			AH		
Series	Type	Lead	Specifications	Stroke	Power / I/O cable length
S7	Standard	S 24mm	AH High rigidity	50 ↓ 50mm	Refer to "Power / I/O Cable Length" below
DS7	Digital speed controller	H 16mm M 8mm L 4mm		800 ↓ 800mm (Every 50mm)	Refer to "Options" below

Stroke

Stroke (mm)	S7□AH	DS7□AH	Stroke (mm)	S7□AH	DS7□AH
50	○	○	450	○	○
100	○	○	500	○	○
150	○	○	550	○	○
200	○	○	600	○	○
250	○	○	650	○	○
300	○	○	700	○	○
350	○	○	750	○	○
400	○	○	800	○	○

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Specified grease specification (Note 2) (Note 3)	G1/G5	2-381
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Slider part roller specification (Note 4)	SR	2-386
split motor and controller power supply specification	TMD2	2-387
Double slider specification (Note 3) (Note 4) (Note 5)	W	2-129
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

- (Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
- (Note 2) The maximum speed and payload of the specified grease specification (G1) option are the same as the speed and payload by acceleration/deceleration of the clean room specification.
- (Note 3) Double slider specification (W) and specified grease specification (G1/G5) cannot be used together.
- (Note 4) When the slider part roller specification (SR) and Double slider specification (W) are used together, the price for the slider part roller specification (SR) becomes double.
- (Note 5) There are some non-selectable leads. See P. 2-123 for details.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (3) Duty must be restricted depending on the ambient operating temperature.
- (4) Pay close attention to the installation orientation.
- (5) Reference value of the overhang load length is under 300mm (under 600mm for double slider specification) in the direction of Ma, Mb and Mc.
- (6) The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, operating conditions should be moderated if some abnormal vibration or noise is observed.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 7) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 6)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

- (Note 6) Only terminal block connector is supplied. Please refer to P. 2-394 for details.
- (Note 7) If RCON-EC connection specification (ACR) is selected as an option, the robot cable is standard.

Four-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 8) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied
S1 ~ S3	1 ~ 3m	○	○
S4 ~ S5	4 ~ 5m	○	○
S6 ~ S7	6 ~ 7m	○	○
S8 ~ S10	8 ~ 10m	○	○

- (Note 8) If RCON-EC connection specification (ACR) is selected as an option, the robot cable is standard.

Effective stroke: Stroke available for actual operation.
(Note) Lead 16 cannot be mounted vertically.

Slider type moment direction

Item	Description
Driving system	Ball screw, φ10mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated aluminum extruded material (A6063SS-T5 equivalent), black alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 900N-m
	Mb: 900N-m
	Mc: 458N-m
Dynamic allowable moment (Note 10)	Ma: 316N-m
	Mb: 376N-m
	Mc: 218N-m
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□56)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 10) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions.

Table of Payload by Speed/Acceleration (double slider specification)

Energy-saving setting disabled (The unit for payload is kg. If blank, operation is not possible.)

Lead 16

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Air cylinder mounting plate	CS	2-373
Digital speed controller installation direction (left) (Note 2)	DL	2-374
Digital speed controller installation direction (right) (Note 2)	DR	2-374
Designated grease specification	G5	2-381
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Available only for DWS10. Be sure to enter a model in the options section of the model number.

POINT Selection Notes

- "Main Specifications" displays the payload's maximum value. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for details.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- Pay close attention to the installation orientation.
- Reference value of the overhang load length is under 400mm in the Ma, Mb, and Mc directions.
- The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.
- The "H" and "S" leads cannot be vertically mounted.

Power / I/O cable length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	<input type="checkbox"/> (Note 3)	<input type="checkbox"/>
1 ~ 3	1 ~ 3m	<input type="checkbox"/>	<input type="checkbox"/>
4 ~ 5	4 ~ 5m	<input type="checkbox"/>	<input type="checkbox"/>
6 ~ 7	6 ~ 7m	<input type="checkbox"/>	<input type="checkbox"/>
8 ~ 10	8 ~ 10m	<input type="checkbox"/>	<input type="checkbox"/>

(Note 3) Only terminal block connector is included. Please refer to P. 2-394 for details.
 (Note 4) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) Robot cable is standard.

4-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 5) (with connectors on both ends)

Options		
Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Air cylinder mounting plate	CS	2-373
Digital speed controller installation direction (left) (Note 2)	DL	2-374
Digital speed controller installation direction (right) (Note 2)	DR	2-374
Designated grease specification	G5	2-381
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

(Note 2) Available only for DWS12. Be sure to enter a model in the options section of the model number.

POINT Selection Notes

- "Main Specifications" displays the payload's maximum value. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for details.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- Duty must be restricted depending on the ambient operating temperature.
- Pay close attention to the installation orientation.
- Reference value of the overhang load length is under 500mm in the Ma, Mb, and Mc directions.
- The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.
- The "H" and "S" leads cannot be vertically mounted.
- Push-motion operations are unavailable for the "S" lead.

Power / I/O cable length			
Standard connector cable

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Designated grease specification	G5	2-381
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

- (1) The belt type may cause vibration or noise during low-speed operation, so set the moving speed to 100mm/s or more.
- (2) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (3) Push-motion operation cannot be performed.
- (4) Pay close attention to the installation orientation.
- (5) Reference value of the overhang load length is under 220mm in the Ma, Mb, and Mc directions.
- (6) The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 3) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied
0	No cable	○ (Note 2)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

(Note 2) Only terminal block connector is supplied. Please refer to P. 2-394 for details.

(Note 3) If RCON-EC connection specification (ACR) is selected as an option.

(Note) The robot cable is standard.

Four-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied
S1 ~ S3	1 ~ 3m	○	○
S4 ~ S5	4 ~ 5m	○	○
S6 ~ S7	6 ~ 7m	○	○
S8 ~ S10	8 ~ 10m	○	○

(Note 4) If RCON-EC connection specification (ACR) is selected as an option.

(Note) The robot cable is standard.

■ Main Specifications

Item		Description
Horizontal	Payload	Max. payload (kg) (energy-saving disabled)
		Max. payload (kg) (energy-saving enabled)
	Speed / acceleration / deceleration	Max. speed (mm/s)
		Min. speed (mm/s)
		Rated acceleration/deceleration (G)
Brake	Max. acceleration/deceleration (G)	
	Brake specification	Non-excitation actuating solenoid brake
Stroke	Brake holding force (kgf)	1.3
	Min. stroke (mm)	300
	Max. stroke (mm)	2600
	Stroke pitch (mm)	100

Item	Description
Driving system	Timing belt, width 9mm, pitch 3mm, lead 48mm equivalent
Positioning repeatability	±0.08mm
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated aluminum extruded material (A6063SS-T5 equivalent), black alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 48.5N-m
	Mb: 69.3N-m
	Mc: 97.1N-m
Dynamic allowable moment (Note 5)	Ma: 11.6N-m
	Mb: 16.6N-m
	Mc: 23.3N-m
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□42)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 5) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions.

- (1) The belt type may cause vibration or noise during low-speed operation, so set the moving speed to 100mm/s or more.
- (2) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (3) Push-motion operation cannot be performed.
- (4) Pay close attention to the installation orientation.
- (5) Reference value of the overhang load length is under 280mm in the Ma, Mb, and Mc directions.
- (6) The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Designated grease specification	G5	2-381
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 3) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 2)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○

Main Specifications

Item		Description
Horizontal	Payload	Max. payload (kg) (energy-saving disabled)
		Max. payload (kg) (energy-saving enabled)
	Speed / acceleration/ deceleration	Max. speed (mm/s)
		Min. speed (mm/s)
		Rated acceleration/deceleration (G)
Brake	Max. acceleration/deceleration (G)	
	Brake specification	Non-excitation actuating solenoid brake
Stroke	Brake holding force (kgf)	2.5
	Min. stroke (mm)	300
	Max. stroke (mm)	2600
	Stroke pitch (mm)	100

Item	Description
Driving system	Timing belt, width 9mm, pitch 3mm, lead 48mm equivalent
Positioning repeatability	±0.08mm
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated aluminum extruded material (A6063S5-T5 equivalent), black alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 79.7N-m
	Mb: 114N-m
	Mc: 157N-m
Dynamic allowable moment (Note 5)	Ma: 17.7N-m
	Mb: 25.3N-m
	Mc: 34.9N-m
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□56)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 5) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions.

POINT Selection Notes

- (1) The payload of "main specification" shows the maximum value. For details, refer to the "table of payload by speed/acceleration."
- (2) For these actuators to operate the DC motor drive power unit "PSA-200" is necessary. One "PSA-200" can supply power up to 6 axes. For details, refer to P. 2-402.
- (3) Depending on the operation condition (payload, acceleration/deceleration), rough guide for available duty ratio varies.
- (4) Pay close attention to the installation orientation.
- (5) Rough guide for overhang load length is 550 mm or less (780mm or less for double slider specification) in Ma/Mb/Mc directions.

Option * Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Specified grease application specification	G5	2-381
Reversed-home specification	NM	2-384
PNP specification (Note 1)	PN	2-384
Double power circuit specification (Note 1)	TMD2	2-384
Wireless communication specification	WL	2-388
Wireless axis operation compatible specification	WL2	2-388

(Note 1) When RCON-EC connection specification (ACR) is selected, PNP specification (PN) or double power circuit specification (TMD2) cannot be selected.

Power/IO cable length

Cable code	Cable length	User wiring specification (discrete wiring)	RCON-EC connection specification (Note 3) (with connectors at both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied

Option

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Specified grease application specification	G5	2-381
Reversed-home specification	NM	2-384
PNP specification (Note 1)	PN	2-384
Double power circuit specification (Note 1)	TMD2	2-387
Wireless communication specification	WL	2-388
Wireless axis operation compatible specification	WL2	2-388

(Note 1) When RCON-EC connection specification (ACR) is selected, PNP specification (PN) or double power circuit specification (TMD2) cannot be selected.

Power/IO cable length

Cable code	Cable length	User wiring specification (discrete wiring)	RCON-EC connection specification (Note 3) (with connectors at both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 2)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

(Note 2) Only terminal block connector is supplied. For details, refer to P. 2-401.

(Note 3) This applies when RCON-EC connection specification (ACR) is selected as an option.

(Note) These are robot cables.

- POINT Selection Notes**
- (1) The payload of "main specification" shows the maximum value. For details, refer to the "table of payload by speed/acceleration."
 - (2) For these actuators to operate the DC motor drive power unit "PSA-200" is necessary. One "PSA-200" can supply power up to 6 axes. For details, refer to P. 2-402.
 - (3) Depending on the operation condition (payload, acceleration/deceleration), rough guide for available duty ratio varies.
 - (4) Pay close attention to the installation orientation.
 - (5) Rough guide for overhang load length is 550 mm or less (795mm or less for double slider specification) in Ma/Mb/Mc directions.
 - (6) The intermediate support type generates some collision noise while operation because of the supporting mechanism (There is no problem from the specification point of view).

Motor power cable length

Cable code	Cable length
0	No cable
1 ~ 3	1 ~ 3m
4 ~ 5	4 ~ 5m
6 ~ 10	6 ~ 10m

(Note) These are robot cables.

	Maximum stroke (mm)	2000	2000	2000	2000	
	Stroke pitch (mm)	50	50	50	50	

Item	Details
Drive method	Ball screw Ø16 mm rolled C10 equivalent
Positioning repeatability	±0.01mm
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated extruded aluminum (A6063SS-T6 equivalent), black alumite treatment
Linear guide	Linear motion endlessly circulating type
Static allowable moment	Ma: 328 N·m [1840 N·m]
	Mb: 328 N·m [1840 N·m]
	Mc: 631 N·m [1260 N·m]
Dynamic allowable moment (Note 4)	Ma: 61.1 N·m [279 N·m]
	Mb: 61.1 N·m [279 N·m]
	Mc: 117 N·m [191 N·m]
Ambient operating air temperature, humidity	0 to 40°C, 85%RH max. (no condensation)
Protection class	-
Vibration resistance/shock resistance	4.9m/s ²
Overseas standard compliance	CE Marking, RoHS Directive
Motor type	AC servo motor (200 V)
Rated motor capacity	100W
Encoder type	Battery-less absolute
Encoder pulse count	16384 pulse/rev

(Note 4) Based on the assumption of a standard rated life of 10,000 km. The traveling life varies depending on the operating conditions and installation conditions.

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Designated grease specification	G5	2-381
Non-motor end specification	NM	2-384
PNP specification (Note 1)	PN	2-384
split motor and controller power supply specification (Note 1)	TMD2	2-387
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

Power / I/O Cable Length

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 3) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 2)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

(Note 2) Only terminal block connector is supplied. Please refer to P. 2-401 for details.
 (Note 3) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) The "PSA-200" motor drive power supply unit is required for operation. A single "PSA-200" unit can provide power for up to 6 axes. Please refer to P. 2-402 for details.
- (3) Estimated allowable duty varies depending on operating conditions (payload and acceleration/deceleration).
- (4) Pay close attention to the installation orientation.
- (5) Reference value of the overhang load length is under 600mm in the Ma, Mb, and Mc directions.

Motor Power Supply Cable Length

	Stroke pitch (mm)	50	50	50	50	

Item	Description
Driving system	Ball screw φ16mm, rolled C10 equivalent
Positioning repeatability	±0.01mm
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated aluminum extruded material (A6063SS-T6 equivalent), black alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 518N-m
	Mb: 518N-m
	Mc: 1210N-m
Dynamic allowable moment (Note 4)	Ma: 107N-m
	Mb: 107N-m
	Mc: 250N-m
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	-
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	AC servo motor (200V)
Motor rated capacity	200W
Encoder type	Battery-less absolute
Number of encoder pulses	16384 pulse/rev

(Note 4) Based on the standard rated operation life of 10,000km. Operation life varies according to operating and mounting conditions.

■ Applicable Controllers

(Note) EC series is equipped with a built-in controller. Please refer to P. 2-399 for details on built-in controllers. The 200V motor power unit "PSA-200" is required for EC-S10/S10X/S13/S13X/S15/S15X models to operate. Please refer to P. 2-402 for details on "PSA-200."

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) The "PSA-200" motor drive power supply unit is required for operation. A single "PSA-200" unit can provide power for up to 6 axes. Please refer to P. 2-402 for details.
- (3) Estimated allowable duty varies depending on operating conditions (payload and acceleration/deceleration).
- (4) Pay close attention to the installation orientation.
- (5) Reference value of the overhang load length is under 600mm in the Ma, Mb, and Mc directions.
- (6) The intermediate support type causes a collision noise during operation due to the structure of the support mechanism (this does not indicate a problem with specifications).

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Designated grease specification	G5	2-381
Non-motor end specification	NM	2-384
PNP specification (Note 1)	PN	2-384
split motor and controller power supply specification (Note 1)	TMD2	2-387
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

Power / I/O Cable Length

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 3) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	<input type="radio"/> (Note 2)	<input type="radio"/>
1 ~ 3	1 ~ 3m	<input type="radio"/>	<input type="radio"/>
4 ~ 5	4 ~ 5m	<input type="radio"/>	<input type="radio"/>
6 ~ 7	6 ~ 7m	<input type="radio"/>	<input type="radio"/>
8 ~ 10	8 ~ 10m	<input type="radio"/>	<input type="radio"/>

(Note 2) Only terminal block connector is supplied. Please refer to P. 2-401 for details.
 (Note 3) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

Motor Power Supply Cable Length

Cable code	Cable length	CB-EC-PW□□□-RB supplied
0	No cable	<input type="radio"/>
1 ~ 3	1 ~ 3m	<input type="radio"/>
4 ~ 5	4 ~ 5m	<input type="radio"/>
6 ~ 10	6 ~ 10m	<input type="radio"/>

(Note) The robot cable is standard.

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Designated grease specification	G5	2-381
Non-motor end specification	NM	2-384
PNP specification (Note 1)	PN	2-384
split motor and controller power supply specification (Note 1)	TMD2	2-387
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) The "PSA-200" motor drive power supply unit is required for operation. A single "PSA-200" unit can provide power for up to 6 axes. Please refer to P. 2-402 for details.
- (3) Estimated allowable duty varies depending on operating conditions (payload and acceleration/deceleration).
- (4) Pay close attention to the installation orientation.
- (5) Reference value of the overhang load length is under 750mm in the Ma, Mb, and Mc directions.

Power / I/O Cable Length

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 3) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	<input type="radio"/> (Note 2)	<input type="radio"/>
1 ~ 3	1 ~ 3m	<input type="radio"/>	<input type="radio"/>
4 ~ 5	4 ~ 5m	<input type="radio"/>	<input type="radio"/>
6 ~ 7	6 ~ 7m	<input type="radio"/>	<input type="radio"/>
8 ~ 10	8 ~ 10m	<input type="radio"/>	<input type="radio"/>

(Note 2) Only terminal block connector is supplied. Please refer to P. 2-401 for details.
 (Note 3) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

Motor Power Supply Cable Length

Cable code	Cable length	CB-EC-PW□□□-RB supplied
0	No cable	<input type="radio"/>
1 ~ 3	1 ~ 3m	<input type="radio"/>
4 ~ 5	4 ~ 5m	<input type="radio"/>
6 ~ 10	6 ~ 10m	<input type="radio"/>

(Note) The robot cable is standard.

■ Main Specifications

Item		Description			
Lead	Ball screw lead (mm)	40	20	10	
Horizontal	Payload	Max. payload (kg)	36	81	108
	Speed / acceleration / deceleration	Max. speed (mm/s)	2000	1000	500
		Rated acceleration/deceleration (G)	0.3	0.3	0.3
Vertical	Payload	Max. payload (kg)	9	18	36
		Max. acceleration/deceleration (G)	1	1	0.7
	Speed / acceleration / deceleration	Max. speed (mm/s)	2000	1000	500
Thrust	Rated thrust (N)	Max. acceleration/deceleration (G)	0.3	0.3	0.3
		Max. acceleration/deceleration (G)	0.7	0.7	0.5
		Max. acceleration/deceleration (G)	0.7	0.7	0.5
Brake	Brake specification	Non-excitation actuating solenoid brake			
	Brake holding force (kgf)	9	18	36	
Stroke	Min. stroke (mm)	100	100	100	
	Max. stroke (mm)	1300	1300	1300	
	Stroke pitch (mm)	50	50	50	

Item	Description
Driving system	Ball screw φ20mm, rolled C10 equivalent
Positioning repeatability	±0.01mm
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated aluminum extruded material (A6063SS-T6 equivalent), black alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 852N-m
	Mb: 852N-m
	Mc: 2010N-m
Dynamic allowable moment (Note 4)	Ma: 162N-m
	Mb: 162N-m
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
	Degree of protection
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	AC servo motor (200V)
Motor rated capacity	400W
Encoder type	Battery-less absolute
Number of encoder pulses	16384 pulse/rev

(Note 4) Based on the standard rated operation life of 10,000km. Operation life varies according to operating and mounting conditions.

■ Applicable Controllers

(Note) EC series is equipped with a built-in controller. Please refer to P. 2-399 for details on built-in controllers.
The 200V motor power unit "PSA-200" is required for EC-S10/S10X/S13/S13X/S15/S15X models to operate. Please refer to P. 2-402 for details on "PSA-200".

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) The "PSA-200" motor drive power supply unit is required for operation. A single "PSA-200" unit can provide power for up to 6 axes. Please refer to P. 2-402 for details.
- (3) Estimated allowable duty varies depending on operating conditions (payload and acceleration/deceleration).
- (4) Pay close attention to the installation orientation.
- (5) Reference value of the overhang load length is under 750mm in the Ma, Mb, and Mc directions.
- (6) The intermediate support type causes a collision noise during operation due to the structure of the support mechanism (this does not indicate a problem with specifications).

Options * Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Hanging fixture	EB	2-374

■ Applicable Controllers

(Note) EC series is equipped with a built-in controller. Please refer to P. 2-399 for details on built-in controllers.
The 200V motor power unit "PSA-200" is required for EC-S10/S10X/S13/S13X/S15/S15X models to operate. Please refer to P. 2-402 for details on "PSA-200."

Wireless axis operation specification	WL2	2-388	

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Be sure to enter a model in the "Options" field in "Model Specification Items."

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 3)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

(Note 3) Only terminal block connector is supplied. Please refer to P. 2-39 for details.
 (Note 4) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

Four-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 5) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied
S1 ~ S3	1 ~ 3m	○	○
S4 ~ S5	4 ~ 5m	○	○
S6 ~ S7	6 ~ 7m	○	○
S8 ~ S10	8 ~ 10m	○	○

(Note 5) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (3) Pay close attention to the installation orientation.
- (4) Reference value of the overhang load length is under 100mm in the Ma, Mb, and Mc directions.
- (5) The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.

Main Specifications

Item		Description			
Lead	Ball screw lead (mm)	6	4	2	
Horizontal	Payload	Max. payload (kg)	3.5	6	9
		Max. speed (mm/s)	360	240	120
	Speed / acceleration / deceleration	Min. speed (mm/s)	8	5	3
		Rated acceleration/deceleration (G)	0.3	0.3	0.3
Vertical	Payload	Max. payload (kg)	1.5	2.5	3.5
		Max. speed (mm/s)	360	240	120
	Speed / acceleration / deceleration	Min. speed (mm/s)	8	5	3
		Rated acceleration/deceleration (G)	0.3	0.3	0.3
Push	Max. push force (N)	45	68	136	
	Max. push speed (mm/s)	20	20	20	
Brake	Brake specification	Non-excitation actuating solenoid brake			
	Brake holding force (kgf)	1.5	2.5	3.5	
Stroke	Min. stroke (mm)	50	50	50	
	Max. stroke (mm)	300	300	300	
	Stroke pitch (mm)	50	50	50	

Item	Description
Driving system	Ball screw $\phi 6\text{mm}$, rolled C10
Positioning repeatability	$\pm 0.05\text{mm}$
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated aluminum extruded material (A6063S5-T5 equivalent), black alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 9.5N-m
	Mb: 13.5N-m
	Mc: 15.1N-m
Dynamic allowable moment (Note 6)	Ma: 3.8N-m
	Mb: 5.4N-m
	Mc: 6.1N-m
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor ($\square 28$)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 6) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Foot bracket	FT	2-377
Specified grease specification (Note 2)	G5	2-381
Motor side-mounted to left (Note 3)	ML	2-381
Motor side-mounted to right (Note 3)	MR	2-381
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Controller specification for slider (Note 4)	SR	2-386
Slider spacer (Note 2) (Note 5)	SS	2-387
split motor and controller power supply specification	TMD2	2-387
Double slider specification (Note 2) (Note 4) (Note 6)	W	2-183
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Double slider specification (W), specified grease specification (G5) and slider space (SS) cannot be used together.
 (Note 3) Specify either model code in the option column of the model specification items.
 (Note 4) When the slider part roller specification (SR) and Double slider specification (W) are used together, the price for the slider part roller specification (SR) becomes double.
 (Note 5) Only DS6□R can be selected.
 (Note 6) Some leads are not selectable. Refer to P. 2-183 for details.

POINT Selection Notes

- The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- Duty must be restricted depending on the ambient operating temperature.
- Pay close attention to the installation orientation.
- Reference value of the overhang load length is under 220mm in the Ma, Mb, and Mc directions (under 440mm for double slider specification).
- The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.

Cable code	Cable length	User wiring specification (flying leads) CB-EC-PWBIO□□□-RB supplied	RCON-EC connection specification (Note 8) (with connectors on both ends) CB-REC-PWBIO□□□-RB supplied

Stroke and Max Speed (double slider specification)

Lead	Nominal stroke	200	250	300	350	400
	Effective stroke	50	100	150	200	250
(mm)	Energy-saving setting	(mm)	(mm)	(mm)	(mm)	(mm)
12	Disabled	560				
	Enabled	440				
6	Disabled	340 <280>				
	Enabled	280 <220>				
3	Disabled	200 <170>			188 <170>	
	Enabled	170 <140>				

(Unit: mm/s)

(Note) Values in brackets < > are for vertical use.
(Note) Nominal stroke: Stroke shown in the model number.
Effective stroke: Stroke available for actual operation.

Correlation between torque and current limit (double slider specification)

(Note) Same values as single slider specification.

Dimensions (double slider specification)

CAD drawings can be downloaded from our website.
www.intelligentactuator.com

EC-(D) S6□R <double slider specification>

(Note) When the slider is returning to its home position, be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
 (Note) External view of the motor differs for product with a digital speed controller.
 Refer to the external view for single slider with digital speed controller for details.
 (Note) Connect the slider according to the slider cover span or distance between reamed holes shown in the drawing.

ST: Stroke
 M.E: Mechanical end
 S.E: Stroke end

Dimensions by stroke

	Nominal stroke	200	250	300	350	400
	Effective stroke	50	100	150	200	250

200	○	○	450	○	○
250	○	○	500	○	○

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Foot bracket	FT	2-377
Specified grease specification (Note 2)	G5	2-381
Motor side-mounted to left (Note 3)	ML	2-381
Motor side-mounted to right (Note 3)	MR	2-381
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Slider part roller specification (Note 4)	SR	2-386
Slider spacer (Note 2) (Note 5)	SS	2-387
split motor and controller power supply specification	TMD2	2-387
Double slider specification (Note 2) (Note 4) (Note 6)	W	2-189
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

- (Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Double slider specification (W), specified grease specification (G5) and slider space (SS) cannot be used together.
 (Note 3) Specify either one of model code in the option column the model specification item.
 (Note 4) When the slider part roller specification (SR) and Double slider specification (W) are used together, the price for the slider part roller specification (SR) becomes double.
 (Note 5) Only DS7□R can be selected.
 (Note 6) There are some non-selectable leads. See P. 2-189 for details.

- The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- Duty must be restricted depending on the ambient operating temperature.
- Pay close attention to the installation orientation.
- Reference value of the overhang load length is under 280mm in the Ma, Mb, and Mc directions (under 560mm for double slider specification).
- The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 8) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 7)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

- (Note 7) Only terminal block connector is supplied. Please refer to P. 2-394 for details.
 (Note 8) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

Four-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 9) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied
S1 ~ S3	1 ~ 3m	○	○
S4 ~ S5	4 ~ 5m	○	○
S6 ~ S7	6 ~ 7m	○	○
S8 ~ S10	8 ~ 10m	○	○

- (Note 9) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

Item	Description
Driving system	Ball screw, φ12mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated aluminum extruded material (A6063SS-T5 equivalent), black alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 79.7N-m
	Mb: 114N-m
	Mc: 157N-m
Dynamic allowable moment (Note 10)	Ma: 17.7N-m
	Mb: 25.3N-m
	Mc: 34.9N-m
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□56)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 10) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions.

Stroke and Max Speed (double slider specification)

Lead	Nominal stroke	200~300	350	400	450	500
	Effective stroke	50Z150	200	250	300	350
(mm)	Energy-saving setting (Every 50mm)	(mm)	(mm)	(mm)	(mm)	(mm)
	16	Disabled	560			
	Enabled	420				
8	Disabled	280 <210>				
	Enabled	210 <140>				
4	Disabled	175 <140>			163 <140>	
	Enabled	120 <105>				

(Unit: mm/s)

(Note) Values in brackets <> are for vertical use.
(Note) Nominal stroke: Stroke shown in the model number.
Effective stroke: Stroke available for actual operation.

Correlation between torque and current limit (double slider specification)

(Note) Same values as single slider specification.

Dimensions (double slider specification)

CAD drawings can be downloaded from our website.
www.intelligentactuator.com

EC-(D) S6□R <double slider specification>

(Note) When the slider is returning to its home position, be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
 (Note) External view of the motor differs for product with a digital speed controller.
 Refer to the external view for single slider with digital speed controller for details.
 (Note) Connect the slider according to the slider cover span or distance between reamed holes shown in the drawing.

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Foot bracket	FT	2-377
Specified grease specification (Note 2)	G5	2-381
Motor side-mounted to left (Note 3)	ML	2-381
Motor side-mounted to right (Note 3)	MR	2-381
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Slider part roller specification (Note 4)	SR	2-386
Slider spacer (Note 2) (Note 5)	SS	2-387
split motor and controller power supply specification	TMD2	2-387
Double slider specification (Note 2) (Note 4) (Note 6)	W	2-189
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

- (Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
- (Note 2) Double slider specification (W), specified grease specification (G5) and slider space (SS) cannot be used together.
- (Note 3) Specify either one of model code in the option column the model specification item.
- (Note 4) When the slider part roller specification (SR) and Double slider specification (W) are used together, the price for the slider part roller specification (SR) becomes double.
- (Note 5) Only DS6 □ AHR can be selected.
- (Note 6) There are some non-selectable leads. See P. 2-195 for details.

- The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- Duty must be restricted depending on the ambient operating temperature.
- Pay close attention to the installation orientation.
- Reference value of the overhang load length is under 300mm in the Ma, Mb, and Mc directions (under 600mm for double slider specification).
- The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 8) (with connectors on both ends)
		CB-EC-PWBIO □ □ □ -RB supplied	CB-REC-PWBIO □ □ □ -RB supplied
0	No cable	○ (Note 7)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

- (Note 7) Only terminal block connector is supplied. Please refer to P. 2-394 for details.
- (Note 8) If RCON-EC connection specification (ACR) is selected as an option. (Note) The robot cable is standard.

Four-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 9) (with connectors on both ends)
		CB-EC2-PWBIO □ □ □ -RB supplied	CB-REC2-PWBIO □ □ □ -RB supplied
S1 ~ S3	1 ~ 3m	○	○
S4 ~ S5	4 ~ 5m	○	○
S6 ~ S7	6 ~ 7m	○	○
S8 ~ S10	8 ~ 10m	○	○

- (Note 9) If RCON-EC connection specification (ACR) is selected as an option. (Note) The robot cable is standard.

Item	Description
Driving system	Ball screw, φ10mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated aluminum extruded material (A6063S5-T6 equivalent), black alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 48.5N·m
	Mb: 69.3N·m
	Mc: 103N·m
Dynamic allowable moment (Note 10)	Ma: 33.7N·m
	Mb: 40.2N·m
	Mc: 55.3N·m
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□42)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 10) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions.

Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 546N·m
	Mb: 779N·m
	Mc: 205N·m
Dynamic allowable moment (Note 11)	Ma: 167N·m
	Mb: 199N·m
	Mc: 89.8N·m
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration & shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□42)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note) Nominal stroke: Stroke shown in the model number.
Effective stroke: Stroke available for actual operation.
(Note) Lead 16 cannot be mounted vertically.

(Note 11) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions.

Slider type moment direction

Table of Payload by Speed/Acceleration (double slider specification)

Energy-saving setting disabled (The unit for payload is kg. If blank, operation is not possible.)

Lead 12

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Foot bracket	FT	2-377
Specified grease specification (Note 2)	G5	2-381
Motor side-mounted to left (Note 3)	ML	2-381
Motor side-mounted to right (Note 3)	MR	2-381
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Slider part roller specification (Note 4)	SR	2-386
Slider spacer (Note 2) (Note 5)	SS	2-387
split motor and controller power supply specification	TMD2	2-387
Double slider specification (Note 2) (Note 4) (Note 6)	W	2-201
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

- (Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
- (Note 2) Double slider specification (W), specified grease specification (G5) and slider space (SS) cannot be used together.
- (Note 3) Specify either one of model code in the option column the model specification item.
- (Note 4) When the slider part roller specification (SR) and Double slider specification (W) are used together, the price for the slider part roller specification (SR) becomes double.
- (Note 5) Only DS7□AHR can be selected.
- (Note 6) There are some non-selectable leads. See P. 2-201 for details.

POINT Selection Notes

- The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- Duty must be restricted depending on the ambient operating temperature.
- Pay close attention to the installation orientation.
- Reference value of the overhang load length is under 300mm in the Ma, Mb, and Mc directions (under 600mm for double slider specification).
- The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 8) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 7)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

- (Note 7) Only terminal block connector is supplied. Please refer to P. 2-394 for details.
- (Note 8) If RCON-EC connection specification (ACR) is selected as an option. (Note) The robot cable is standard.

Four-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 9) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied
S1 ~ S3	1 ~ 3m	○	○
S4 ~ S5	4 ~ 5m	○	○
S6 ~ S7	6 ~ 7m	○	○
S8 ~ S10	8 ~ 10m	○	○

- (Note 9) If RCON-EC connection specification (ACR) is selected as an option. (Note) The robot cable is standard.

	Max. effective stroke (mm)	650	650	650	
	Stroke pitch (mm)	50	50	50	

(Note) Nominal stroke: Stroke shown in the model number.
Effective stroke: Stroke available for actual operation.
(Note) Lead 16 cannot be mounted vertically.

Item	Description
Driving system	Ball screw, φ12mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated aluminum extruded material (A6063SS-T6 equivalent), black alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 900N·m
	Mb: 900N·m
	Mc: 458N·m
Dynamic allowable moment (Note 11)	Ma: 316N·m
	Mb: 376N·m
	Mc: 218N·m
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration & shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□56)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 11) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions.

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) The value of the horizontal payload assumes that there is an external guide. Please be aware that the anti-rotation stopper can be damaged when an external force is applied to the rod from any direction other than the moving direction.
- (3) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (4) Duty must be restricted depending on the ambient operating temperature.
- (5) Pay close attention to the installation orientation.

Power / I/O Cable Length

Standard connector cables

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 3) (with connectors on both ends)

		Brake specification	Non-excitation actuating solenoid brake			
Brake	Brake holding force (kgf)	3	8	18	19	
		Min. stroke (mm)	50	50	50	50
Stroke	Max. stroke (mm)	300	300	300	300	
		Stroke pitch (mm)	50	50	50	50

Item		Description	
Driving system		Ball screw, φ12mm, rolled C10	
Positioning repeatability		±0.05mm	
Lost motion		- (two-point positioning function; cannot be represented)	
Rod		φ30mm, material: aluminum, hard alumite treatment	
Rod non-rotation precision (Note 5)		±1.5 degrees	
Allowable load and torque on rod tip		0.5N·m	
Ambient operating temperature, humidity		0 ~ 40°C, 85%RH or less (Non-condensing)	
Degree of protection		IP20	
Vibration/shock resistance		4.9m/s ²	
Overseas standards		CE marking, RoHS directive	
Motor type		Stepper motor (□56)	
Encoder type		Incremental/battery-less absolute	
Number of encoder pulses		800 pulse/rev	

(Note 5) The rod tip angular displacement (initial reference value) when the allowable static torque on rod tip is applied with the rod fully retracted.

Table of Payload by Speed/Acceleration

■ **Energy-saving setting disabled** (The unit for payload is kg. If blank, operation is not possible.)

Lead 24

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Tip adapter (flange)	FFA	2-375
Flange (front)	FL	2-376
Foot bracket	FT	2-377
Specified grease specification	G5	2-381
Motor mounting direction changed (bottom) (Note 2)	MOB	2-381
Motor mounting direction changed (left) (Note 2)	MOL	2-381
Motor mounting direction changed (right) (Note 2)	MOR	2-381
Motor mounting direction changed (up) (Note 2)	MOT	2-381
Tip adapter (internal thread)	NFA	2-382
Knuckle joint (Note 3)	NL	2-383
Knuckle joint + swaying bracket (Note 3)	NJPB	2-384
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Clevis bracket (Note 3)	QR	2-385
Clevis bracket + swaying bracket (Note 3)	QRPB	2-386
split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Be sure to enter a model in the option column for Model Specification Items.
 (Note 3) Purchase clevis bracket (QR or QRPB) and knuckle joint (NJ or NJPB) together as a set. To be mounted by customer.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) Radial cylinders are equipped with a built-in guide.
- (3) The value of the horizontal payload assumes that there is an external guide.
- (4) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (5) Pay close attention to the installation orientation.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 5) (with connectors on both ends)

165	○	○	315	○	○

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Tip adapter (flange)	FFA	2-375
Flange (front)	FL	2-376
Foot bracket	FT	2-377
Specified grease specification	G5	2-381
Tip adapter (internal thread)	NFA	2-382
Knuckle joint (Note 2)	NJ	2-383
Knuckle joint + oscillation receiving bracket (Note 2)	NJPB	2-384
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Clevis bracket (Note 2)	QR	2-385
Clevis bracket + oscillation receiving bracket (Note 2)	QRPB	2-386
split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) The clevis bracket (QR or QRPB) and knuckle joint (NJ or NJPB) are sold as a set. The assembly is to be performed by the customer.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) Radial cylinders are equipped with a built-in guide.
- (3) The value of the horizontal payload assumes that there is an external guide.
- (4) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (5) Duty must be restricted depending on the ambient operating temperature.
- (6) Pay close attention to the installation orientation.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Tip adapter (flange)	FFA	2-375
Flange (front)	FL	2-376
Specified grease specification	G5	2-381
Tip adapter (internal thread)	NFA	2-382
Knuckle joint (Note 2)	NJ	2-383
Knuckle joint + oscillation receiving bracket (Note 2)	NJPB	2-384
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Clevis bracket (Note 2)	QR	2-385
Clevis bracket + oscillation receiving bracket (Note 2)	QRPB	2-386
split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Can be selected for strokes 50 - 400mm only. The clevis bracket (QR or QRPB) and knuckle joint (NJ or NJPB) are sold as a set. The assembly is to be performed by the customer.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) Radial cylinders are equipped with a built-in guide.
- (3) The value of the horizontal payload assumes that there is an external guide.
- (4) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (5) Duty must be restricted depending on the ambient operating temperature.
- (6) Pay close attention to the installation orientation.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 3)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

(Note 3) Only terminal block connector is supplied. Please refer to P. 288 for details.
 (Note 4) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

Four-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 5) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied

Item	Description
Driving system	Ball screw, φ10mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Linear guide	Linear motion infinite circulating type
Rods	φ25mm, material: aluminum, hard alumite treatment
Rod non-rotation precision (Note 6)	0 degrees
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□42)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 6) Displacement angle in the rod rotational direction when no load is applied.

Table of Payload by Speed/Acceleration

Energy-saving setting disabled (The unit for payload is kg. If blank, operation is not possible.)

Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) PNP specification (PN) and twin power supply specification (TMD2) cannot be selected for RCON-EC connection specification (ACR).

POINT Selection Notes

- The actuator specifications display the payload's maximum value. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details. The radial cylinder is equipped with a guide.
- Please contact IAI for radial load applied on the rod.
- Horizontal payload shows a value when an external guide is used.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values. For push motion, mount an external guide.
- Duty must be restricted depending on the ambient operating temperature.
- Pay close attention to the installation orientation. Please refer to P. 1-261 for details
- Cannot operate in sway operations.

Item	Description
Driving system	Ball screw, φ10mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Linear guide	Linear motion infinite circulating type
Rod	φ25mm material: aluminum hard alumite treatment
Rod non-rotation accuracy (Note 5)	0 degree
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration & shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□42)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 5) Displacement angle to the rod rotation direction at no load applied.

Table of Payload by Speed/Acceleration

Energy-saving setting disabled The unit for payload is kg. If blank, operation is not possible.

Lead 20

Orientation	Horizontal				Vertical	
	Speed (mm/s)	Acceleration (G)			0.3	0.5
0	6	6	5	5		
160	6	6	5	5	1.5	1.5
320	6	6	5	3	1.5	1.5
480	6	6	3	2	1.5	1.5
640	6	4	2		1	1
800	4	3			0.5	

Lead 12

Orientation	Horizontal				Vertical	
	Speed (mm/s)	Acceleration (G)			0.3	0.5
0	25	18	16	12		
100	25	18	16	12	4	4
200	23	18	16	10	4	4
400	20	14	10	6	4	4
500	15	8	6	2	3	2.5
700	6	2			0.5	

(Note) Refer to the caution below when "G5" option is selected.

Lead 6

Orientation	Horizontal				Vertical	
	Speed (mm/s)	Acceleration (G)			0.3	0.5
0	40	35	30	25		
50	40	35	30	25	10	10
100	40	35	30	25	10	10
200	40	30	25	20	10	10
250	40	27.5	22.5	18	9	8
330	29	14	10	6	5	4

(Note) Refer to the caution below when "G5" option is selected.

Lead 3

Orientation	Horizontal				Vertical	
	Speed (mm/s)	Acceleration (G)			0.3	0.5
0	60	50	45	40		
50	60	50	45	40	20	20
100	60	50	45	40	20	20
125	60	50	40	30	10	10
145	40	35	25	20	6	5

(Note) Refer to the caution below when "G5" option is selected.

Energy-saving setting enabled The unit for payload is kg. If blank, operation is not possible.

Lead 20

Orientation	Horizontal			Vertical
	Speed (mm/s)	Acceleration (G)		0.3
0	6	5		
160	6	5		1
320	6	5		1
480	4	3		1
640	3	1		0.5

Lead 12

Orientation	Horizontal			Vertical
	Speed (mm/s)	Acceleration (G)		0.3
0	25	10		
100	25	10		4
200	25	10		4
280	20	8		3
400	10	5		2
500	5	2		1

(Note) Refer to the caution below when "G5" option is selected.

Lead 6

Orientation	Horizontal			Vertical
	Speed (mm/s)	Acceleration (G)		0.3
0	40	20		
50	40	20		10
100	40	20		10
150	40	20		8
200	35	18		5
250	10	6		3

(Note) Refer to the caution below when "G5" option is selected.

Lead 3

Orientation	Horizontal			Vertical
	Speed (mm/s)	Acceleration (G)		0.3
0	40	25		
25	40	25		20
50	40	25		20
100	40	25		12
125	40	25		5

(Note) Refer to the caution below when "G5" option is selected.

<Cautions on "G5" (specified grease specification) option>

When used in ambient temperature of under 10°C, use at the speed specified below.

- * Lead 12: 400mm/s or less
- * Lead 6: 200mm/s or less
- * Lead 3: 100mm/s or less

Stroke and Max Speed

Lead (mm)	Energy-saving setting	600 ~ 1000 (Every 50mm)
	20	Disabled
Enabled		640
12	Disabled	700
	Enabled	500
6	Disabled	330
	Enabled	250
3	Disabled	145
	Enabled	125

(Unit: mm/s)

Correlation between torque and current limit

Rod deflection value (reference value)

■ EC-RR6X□AH

- *1 When the rod is returning to its home position, be careful of possible interference from surrounding objects, as it will travel until it reaches the M.E.
- *2 The direction of width across flats varies depending on the product. Those flats cannot be used for reference plane.

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Tip adapter (flange)	FFA	2-375
Flange (front)	FL	2-376
Specified grease specification	G5	2-381
Tip adapter (internal thread)	NFA	2-382
Knuckle joint (Note 2)	NJ	2-383
Knuckle joint + oscillation receiving bracket (Note 2)	NJPB	2-384
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Clevis bracket (Note 2)	QR	2-385
Clevis bracket + oscillation receiving bracket (Note 2)	QRPB	2-386
split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Can be selected for strokes 50 - 500mm only. The clevis bracket (QR or QRPB) and knuckle joint (NJ or NJPB) are sold as a set. The assembly is to be performed by the customer.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) Radial cylinders are equipped with a built-in guide.
- (3) The value of the horizontal payload assumes that there is an external guide.
- (4) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (5) Duty must be restricted depending on the ambient operating temperature.
- (6) Pay close attention to the installation orientation.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied
0	No cable	○ (Note 3)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

(Note 3) Only terminal block connector is supplied. Please refer to P. 2-394 for details.
 (Note 4) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

Four-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 5) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied

Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) PNP specification (PN) and twin power supply specification (TMD2) cannot be selected for RCON-EC connection specification (ACR).

POINT
選定上の注意

- The actuator specifications display the payload's maximum value. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details. The radial cylinder is equipped with a guide.
- Please contact IAI for radial load applied on the rod.
- Horizontal payload shows a value when an external guide is used.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values. The push force may deviate due to rod deflection. For push motion, mount an external guide.
- Duty must be restricted depending on the ambient operating temperature.
- Pay close attention to the installation orientation.
- Cannot operate in sway operations.

Power / I/O cable length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 3) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 2)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

(Note 2) Only terminal block connector is included. Please refer to P. 2-394 for details.
 (Note 3) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) Robot cable is standard.

4-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied

	Stroke pitch (mm)	50	50	50	50

Item	Description
Driving system	Ball screw, ϕ 12mm, rolled C10
Positioning repeatability	\pm 0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Linear guide	Linear motion infinite circulating type
Rod	ϕ 30mm material: aluminum hard alumite treatment
Rod non-rotation accuracy (Note 5)	0 degree
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration & shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (\square 56)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 5) Displacement angle to the rod rotation direction at no load applied.

Table of Payload by Speed/Acceleration

Energy-saving setting disabled The unit for payload is kg. If blank, operation is not possible.

Lead 24

Orientation	Horizontal				Vertical	
	Acceleration (G)

Knuckle joint + swaying bracket (Note 4)	NJPB	2-384
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Clevis bracket (Note 4)	QR	2-385
Clevis bracket + swaying bracket (Note 4)	QRPB	2-386
split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Can be selected if stroke is at least 150mm. However, can also be selected for a stroke of 100mm for incremental without brake.
 (Note 3) Be sure to enter a code in the "Options" field in "Model Specification Items."
 (Note 4) Purchase clevis bracket (QR or QRPB) and knuckle joint (NJ or NJPB) together as a set. To be mounted by customer.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) Radial cylinders are equipped with a built-in guide. Please contact IAI for radial load applied on the rod.
- (3) The value of the horizontal payload assumes that there is an external guide.
- (4) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (5) Pay close attention to the installation orientation.

Power / I/O Cable Length

Main Specifications

Item		Description			
Lead	Ball screw lead (mm)	6	4	2	
Horizontal	Payload	Max. payload (kg)	9	14	18
		Max. speed (mm/s)	360	240	120
	Speed / acceleration / deceleration	Min. speed (mm/s)	8	5	3
		Rated acceleration/deceleration (G)	0.3	0.3	0.3
Vertical	Payload	Max. payload (kg)	1.5	2.5	3.5
		Max. speed (mm/s)	360	240	120
	Speed / acceleration / deceleration	Min. speed (mm/s)	8	5	3
		Rated acceleration/deceleration (G)	0.3	0.3	0.3
Push	Max. push force (N)	45	68	136	
	Max. push speed (mm/s)	20	20	20	
Brake	Brake specification	Non-excitation actuating solenoid brake			
	Brake holding force (kgf)	1.5	2.5	3.5	
Stroke	Min. stroke (mm)	50	50	50	
	Max. stroke (mm)	300	300	300	
	Stroke pitch (mm)	50	50	50	

Item	Description
Driving system	Ball screw $\phi 6$ mm, rolled C10
Positioning repeatability	± 0.05 mm
Lost motion	- (two-point positioning function; cannot be represented)
Linear guide	Linear motion infinite circulating type
Rods	$\phi 16$ mm, material: aluminum, hard alumite treatment
Rod non-rotation precision (Note 8)	0 degrees
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor ($\square 28$)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 8) Displacement angle in the rod rotational direction when no load is applied.

Table of Payload by Speed/Acceleration

The unit for payload is kg.

Lead 6

Orientation	Horizontal		Vertical
	Acceleration (G)		
Speed (mm/s)	0.3	0.5	0.3
0	9	7	1.5
120	9	7	1.5
210	9	7	1.5
255	8	5	1.5
315	7	3	1
360	6	2	1

Lead 4

Orientation	Horizontal		Vertical
	Acceleration (G)		
Speed (mm/s)	0.3	0.3	0.3
0	14	14	2.5
80	14	14	2.5
140	14	14	2.5
170	14	14	2.5
210	14	14	2.5
240	13	13	2.5

Lead 2

Orientation	Horizontal		Vertical
	Acceleration (G)		
Speed (mm/s)	0.3	0.3	0.3
0	18	18	3.5
40	18	18	3.5
70	18	18	3.5
85	18	18	3.5
105	18	18	3.5
120	18	18	3

Stroke and Max Speed

Lead (mm)	50 ~ 150 (Every 50mm)	200 (mm)	250 (mm)	300 (mm)
6	360	300	210	150
4	240	200	140	100
2	120	100	70	50

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Tip adapter (flange)	FFA	2-375
Flange (front) (Note 2)	FL	2-376
Foot bracket	FT	2-377
Specified grease specification	G5	2-381
Motor side-mounted to left (Note 3)	ML	2-381
Motor side-mounted to right (Note 3)	MR	2-381
Tip adapter (internal thread)	NFA	2-382
Knuckle joint (Note 4)	NJ	2-383
Knuckle joint + swaying bracket (Note 4)	NJPB	2-384
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Clevis bracket (Note 4)	QR	2-385
Clevis bracket + swaying bracket (Note 4)	QRPB	2-386
split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Can be selected if stroke is at least 150mm. However, can also be selected for a stroke of 100mm for incremental without brake.
 (Note 3) Be sure to enter a code in the "Options" field in "Model Specification Items."
 (Note 4) Purchase clevis bracket (QR or QRPB) and knuckle joint (NJ or NJPB) together as a set. To be mounted by customer.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) Radial cylinders are equipped with a built-in guide. Please contact IAI for radial load applied on the rod.
- (3) The value of the horizontal payload assumes that there is an external guide.
- (4) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (5) Duty must be restricted depending on the ambient operating temperature.
- (6) Pay close attention to the installation orientation.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 6) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) A brake (B) and flange (FL) cannot be both selected for a system operating at minimum stroke (65mm).
 (Note 3) Be sure to enter a code in the "Options" field in "Model Specification Items."
 (Note 4) The clevis bracket (QR or QRPB) and knuckle joint (NJ or NJPB) are sold as a set. The assembly is to be performed by the customer.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) Radial cylinders are equipped with a built-in guide. Please contact IAI for radial load applied on the rod.
- (3) The value of the horizontal payload assumes that there is an external guide.
- (4) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (5) Duty must be restricted depending on the ambient operating temperature.
- (6) Pay close attention to the installation orientation.

Main Specifications

Item		Description				
Lead	Ball screw lead (mm)	20	12	6	3	
Horizontal	Payload	Max. payload (kg) (energy-saving disabled)	6	25	40	60
		Max. payload (kg) (energy-saving enabled)	6	25	40	40
	Speed / acceleration / deceleration	Max. speed (mm/s)	800	700	450	225
		Min. speed (mm/s)	25	15	8	4
Vertical	Payload	Max. payload (kg) (energy-saving disabled)	1.5	4	10	12.5
		Max. payload (kg) (energy-saving enabled)	1	4	10	12.5
	Speed / acceleration / deceleration	Max. speed (mm/s)	800	700	450	225
		Min. speed (mm/s)	25	15	8	4
Push	Max. push force (N)	67	112	224	449	
		20	20	20	20	
	Max. push speed (mm/s)	20	20	20	20	
		20	20	20	20	
Brake	Brake specification	Non-excitation actuating solenoid brake				
	Brake holding force (kgf)	1.5	4	10	12.5	
Stroke	Min. stroke (mm)	65	65	65	65	
	Max. stroke (mm)	315	315	315	315	
	Stroke pitch (mm)	50	50	50	50	

Item	Description
Driving system	Ball screw φ10mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Linear guide	Linear motion infinite circulating type
Rod	φ25mm, material: aluminum, hard alumite treatment
Rod non-rotation precision (Note 8)	0 degrees
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□42)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 8) Displacement angle in the rod rotational direction when no load is applied.

Table of Payload by Speed/Acceleration

■ **Energy-saving setting disabled** (The unit for payload is kg. If blank, operation is not possible.)

Lead 20

Orientation Speed (mm/s)	Horizontal Acceleration (G)						Vertical		
	0.3	0.5	0.7	1	0.3	0.5	0.3	0.5	1

PNP specification	PN	2-384
Clevis bracket (Note 4)	QR	2-385
Clevis bracket + swaying bracket (Note 4)	QRPB	2-386
split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) A brake (B) and flange (FL) cannot be both selected for a system operating at minimum stroke (65mm).
 (Note 3) Be sure to enter a code in the "Options" field in "Model Specification Items."
 (Note 4) The clevis bracket (QR or QRPB) and knuckle joint (NJ or NJPB) are sold as a set. The assembly is to be performed by the customer.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) Radial cylinders are equipped with a built-in guide. Please contact IAI for radial load applied on the rod.
- (3) The value of the horizontal payload assumes that there is an external guide.
- (4) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (5) Duty must be restricted depending on the ambient operating temperature.
- (6) Pay close attention to the installation orientation.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 6) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake (Note 2)	B	2-373
Tip adapter (flange)	FFA	2-375
Flange (front) (Note 2)	FL	2-376
Foot bracket	FT	2-377
Specified grease specification	G5	2-381
Motor side-mounted to left (Note 3)	ML	2-381
Motor side-mounted to right (Note 3)	MR	2-381
Tip adapter (internal thread)	NFA	2-382
Knuckle joint (Note 4)	NJ	2-383
Knuckle joint + swaying bracket (Note 4)	NJPB	2-384
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Clevis bracket (Note 4)	QR	2-385
Clevis bracket + swaying bracket (Note 4)	QRPB	2-386
split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) A brake (B) and flange (FL) cannot be both selected for a system operating at minimum stroke (50mm).
 (Note 3) Be sure to enter a code in the "Options" field in "Model Specification Items."
 (Note 4) The clevis bracket (QR or QRPB) and knuckle joint (NJ or NJPB) are sold as a set. The assembly is to be performed by the customer.

POINT Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. If the energy-saving setting is enabled, the main specifications will change. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- (2) Radial cylinders are equipped with a built-in guide. Please contact IAI for radial load applied on the rod.
- (3) The value of the horizontal payload assumes that there is an external guide.
- (4) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- (5) Duty must be restricted depending on the ambient operating temperature.
- (6) Pay close attention to the installation orientation.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 6) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 5)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

(Note 5) Only terminal block connector is supplied. Please refer to P. 2-394 for details.
 (Note 6) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

Four-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 7) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied

Item	Description
Driving system	Ball screw φ10mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Linear guide	Linear motion infinite circulating type
Rods	φ25mm, material: aluminum, hard alumite treatment
Rod non-rotation precision (Note 8)	0 degrees
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□42)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 8) Displacement angle in the rod rotational direction when no load is applied.

Table of Payload by Speed/Acceleration

Energy-saving setting disabled (The unit for payload is kg. If blank, operation is not possible.)

Lead 20

EC-RP4

Mini Side-mounted Motor Body Width **30 mm** 24v Stepper Motor

Model Specification Items

EC	RP4				
Series	Type	Lead	Stroke	Power / I/O cable length	Options
		H 6mm M 4mm L 2mm	30 30mm 50 50mm	Refer to "Power / I/O Cable Length" below	Refer to "Options" below

- The feed screw has no rotation stop mechanism. Add a rotation stop mechanism such as a guide to the tip of the feed screw when in use (if there is no rotation stop, the feed screw will rotate instead of tip of the feed screw when in use (if there is no rotation stop, the feed screw will rotate instead of traveling back and forth). Also, do not use floating joints when connecting the rotation stop mechanism to the rod. Please contact to IAI for more information on the mounting method and conditions.
- The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration.
- The value of the horizontal payload assumes that there is an external guide. Do not apply external force to the rod in a direction other than the moving direction.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- Pay close attention to the installation orientation.

- POINT Selection Notes

 - (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed.
 - (2) Horizontal payload is the value when also using a guide so that radial and moment loads are not applied to the rod. If not installing a guide, refer to "Radial Load and Operation Life."
 - (3) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
 - (4) Be sure to select an option code for the guide mounting direction from the options table below.
 - (5) Pay close attention to the installation orientation.

(Note) The photo above shows the left mounting specification (GT2).

Item	Description
Driving system	Ball screw, φ6mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Static allowable moment	Ma: 5.9N-m
	Mb: 5.9N-m
	Mc: 9.3N-m
Dynamic allowable moment (Note 6)	Ma: 3.77N-m
	Mb: 3.77N-m
	Mc: 6.01N-m
Operation life	5000km or 50 million reciprocations
Ambient operating temperature/humidity	0 ~ 40°C, 85% RH or less (Non-condensing)
Degree of protection	-
Vibration & shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□28)
Encoder Type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 6) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions. Confirm the operation life on P. 1-244.

EC-TW4

Mini Side-mounted Motor Body Width **80 mm** 24v Stepper Motor

Model Specification Items

CE RoHS 10
Horizontal Vertical Side Ceiling

- POINT Selection Notes**
- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed.
 - (2) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
 - (3) The reference values of the overhang load length are 100mm or less in the table top direction for the Ma direction, 50mm or less in the table tip direction, and 120mm or less in the Mb/Mc directions.
 - (4) Pay close attention to the installation orientation.

Stroke

Stroke (mm)	EC-TW4
30	<input type="radio"/>
50	<input type="radio"/>

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Specified grease specification	G5	2-381
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

S4 ~ S5	4 ~ 5m	<input type="radio"/>	<input type="radio"/>
S6 ~ S7	6 ~ 7m	<input type="radio"/>	<input type="radio"/>
S8 ~ S10	8 ~ 10m	<input type="radio"/>	<input type="radio"/>

(Note 4) If RCON-EC connection specification (ACR) is selected as an option. The robot cable is standard.

Item	Description
Driving system	Ball screw, φ6mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Static allowable moment	Ma: 8.3N-m
	Mb: 8.3N-m
	Mc: 26.3N-m
Dynamic allowable moment (Note 5)	Ma: 5.4N-m
	Mb: 5.4N-m
Operation life	5000km or 50 million reciprocations
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	-
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□28)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 5) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions.

Table of Payload by Speed/Acceleration

The unit for payload is kg.

Lead 6

Orientation Speed (mm/s)	Horizontal Acceleration (G)					Vertical	
	0.3	0.5	0.7	1	0.3	0.5

By Stroke

Stroke (mm)	EC-GRB8
20	<input type="radio"/>

Option * Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Cable fixing bracket (front)	FST	2-373
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Split motor and controller power supply specification	TMD2	2-387
Cable fixing bracket (top) (Note 2)	TST	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Can be selected only when selecting the 4-way connector cable.

POINT Selection Notes

- (1) The maximum open/close speed in the Main Specifications represents the operation speed for one side. The relative operation speed is twice the value.
- (2) The maximum grip force in the Main Specifications is the total of the grip force of both fingers when the grip point distance and overhang distance are both 0. For the workpiece weight which can actually be conveyed, refer to the Confirmation of Grip Point Distance.
- (3) When gripping the workpiece, be sure to use push-motion operation.
- (4) The workpiece grip force will be maintained via self-lock even during power cutoffs. To release the workpiece being gripped during a power cutoff, turn the open/close screw on the side, or remove the finger attachment to release the workpiece.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4)

(Note 5) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) Robot cable.

Main Specifications

Item	Description	
Lead	Trapezoidal screw lead (mm)	1.5
	Pulley deceleration ratio	1.5
Grip operation	Max. grip force (N) (both sides)	28
	Max. speed during grip operation (mm/s) (one side)	5
Approach operation	Max. speed (mm/s) (one side)	45
	Min. speed (mm/s) (one side)	5
	Rated acceleration/deceleration (G) (one side)	0.3
Brake	Max. acceleration/deceleration (G) (one side)	0.3
	Brake specification	-
Stroke (one side)	Brake holding force (kgf)	-
	Min. stroke (mm) (one side)	10
	Max. stroke (mm) (one side)	10

Item	Description
Drive system	Trapezoidal screw $\phi 8$
Positioning repeatability	$\pm 0.05\text{mm}$
Lost motion	- (two-point positioning function; cannot be represented)
Backlash (one side)	0.2mm or less
Linear guide	Limited guide
Static allowable moment	Ma: 3.60N·m
	Mc: 10.2N·m
Vertical allowable load (Note 6)	598N
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (no condensation)
Degree of protection	-
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□20)
Encoder type	Incremental (no setting for battery-less absolute option)
Number of encoder pulses	800 pulse/rev

Slide type moment direction

(Note 6) Use at a load exceeding the value above could reduce operation life or lead to damage.

Confirmation of Grip Point Distance

Use with distance (L, H) from finger (jaw) mounting surface to grip point within the range in the graph.

(Note) Use beyond the limited range will cause excess moment to operate on the finger sliding part and interior mechanisms, negatively affecting operation life.

Grip Force

Correlation diagram between grip force and current limit value

(Note) Total value of both fingers when grip point distance (L, H) is 0.
 (Note) Guideline values. There is variation of 0 to 60%. In particular, current limit values set outside the recommended range (colored part of the graph) are more likely to lead to variation.
 (Note) For gripping (pushing), the speed is fixed at 5mm/s.

Guidelines for grip point distance and grip force

(Note) Shows grip force of overhang position when maximum grip force is set to 100%. The results may differ due to the rigidity of the finger attachment used.

(Note) The opening side is home as standard. To set the closing side as home, designate the option (model: NM).

 (Note) The robot cable is standard.

POINT
Selection Notes

- (1) Output torque decreases as rotation speed increases. Refer to the "correlation diagram between rotation speed and output torque" for details.
- (2) The allowable moment of inertia of a part being rotated will vary depending on the rotation speed. Refer to the "correlation diagram between rotation speed and allowable moment of inertia" for details.
- (3) The brake is used for retention purposes only, Do not use it for braking or emergency stopping.
- (4) When sizing, calculate values as described in "Selecting rotary type actuators" and check the usage conditions.
- (5) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques are only reference values.
- (6) The maximum acceleration/deceleration is 0.5G when horizontal or ceiling mounted, or 0.3G when side or vertical mounted.

Number of encoder pulses	800 pulse/rev

Rotary Type Moment Direction

Correlation diagrams

Correlation diagram between rotation speed and output torque

Correlation diagram between rotation speed and allowable moment of inertia

(Note) 0.5G can be used only when horizontal or ceiling mounted.

Homing method and positive rotation direction

330-degree rotation specification

The positive rotation direction will be clockwise when viewing the rotating table from above.
 During home return motion, the table rotates counterclockwise.
 It detects the mechanical stopper position, moves in reverse, and then stops.
 The actuator cannot perform a home return motion in the clockwise direction.
 (Note) For the non-motor end specification, all movement directions are reversed.

Options

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
Shaft adapter	SA	2-386
Table adapter	TA	2-387
split motor and controller power supply specification	TMD2	2-387
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

- (1) Output torque decreases as rotation speed increases. Refer to the "Correlation between rotation speed and output torque" diagram for details.
- (2) The allowable moment of inertia of a part being rotated will vary depending on the rotation speed. Refer to the "Correlation between rotation speed and allowable moment of inertia" diagram for details.
- (3) The brake is used for retention purposes only. Do not use it for braking or emergency stopping.
- (4) When sizing, calculate values as described in "Selecting rotary type actuators" and check the usage conditions.
- (5) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques are only reference values.
- (6) The maximum acceleration/deceleration is 0.7G when horizontal or ceiling mounted, or 0.5G when side or vertical mounted with the energy-saving setting disabled, or 0.5G when horizontal or ceiling mounted, or 0.3G when side or vertical mounted with the energy-saving setting enabled.

Power / I/O Cable Length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 3) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 2)	○
1 ~ 3	1 ~ 3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

(Note 2) Only terminal block connector is supplied. Please refer to P. 2-394 for details.
 (Note 3) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

Four-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied
S1 ~ S3	1 ~ 3m	○	○
S4 ~ S5	4 ~ 5m	○	○
S6 ~ S7	6 ~ 7m	○	○
S8 ~ S10	8 ~ 10m	○	○

(Note 4) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

Main Specifications

Item	Description	
Deceleration ratio	1/45	
Max. torque (N-m)	8.0	
Speed / acceleration / deceleration (Note 5)	Max. speed (degrees/s)	600
	Min. speed (degrees/s)	20
	Rated acceleration/deceleration (G)	0.3
	Max. acceleration/deceleration (G) (Note 6)	0.7
Brake	Brake specification	Non-excitation actuating solenoid brake
	Brake retaining torque (N-m) (Note 7)	5.3
Operation range (degrees)	330	

(Note 5) $1G \approx 9807^{\circ}/s^2$
 (Note 6) Horizontal only. The maximum acceleration/deceleration will be 0.5G when side or vertical mounted.
 (Note 7) Both the allowable moment of inertia and brake retaining torque will not necessarily be established. Confirm that the load torque does not exceed the retaining torque.

Item	Description
Driving system	Hypoid gear + timing belt
Positioning repeatability	± 0.01 degrees
Homing method	Mechanical stopper method
Homing precision	± 0.01 degrees
Backlash	0.2° or less
Allowable thrust load	400N
Allowable load moment (Note 8)	18N-m
Allowable moment of inertia	0.13kg-m ²
Radial run-out	0.1mm or less
Thrust run-out	0.1mm or less
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration/shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□42)
Encoder type	Incremental
Number of encoder pulses	800 pulse/rev

(Note 8) 12N-m when side or vertical mounted.

Rotary type moment direction

Correlation diagrams

Correlation between rotation speed and output torque

Energy-saving setting disabled

Energy-saving setting enabled

Correlation between rotation speed and allowable moment of inertia

Energy-saving setting disabled

(Note) 0.7G can be used only when horizontal or ceiling mounted.

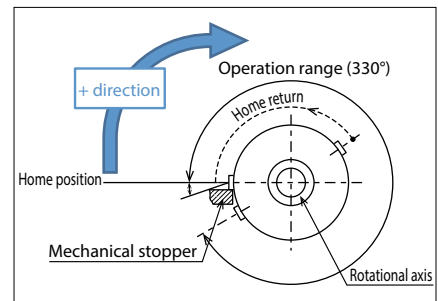

Energy-saving setting enabled

(Note) 0.5G can be used only when horizontal or ceiling mounted.

Homing method and positive rotation direction

330-degree rotation specification

The positive rotation direction will be clockwise when viewing the rotating table from above. During home return motion, the table rotates counterclockwise. It detects the mechanical stopper position, moves in reverse, and then stops. The actuator cannot perform a home return motion in the clockwise direction.
 (Note) For the non-motor end specification, all movement directions are reversed.

 (Note 2) Be sure to enter a code in the option column for Model Specification Items.

POINT Selection Notes

- "Main Specifications" displays the payload's maximum value. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- Pay close attention to the installation orientation.
- Reference value of the overhang load length is under 100mm in the Ma, Mb, and Mc directions. Please contact IAI for overhang load lengths.
- The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.

DS4	Digital speed controller	H 10mm			
		M 5mm			
		L 2.5mm			

Stroke	50	50mm
	100	100mm
	150	150mm
	300	300mm (Every 50mm)

Power / I/O cable length	See power / I/O cable length below
--------------------------	------------------------------------

Options	See options below
---------	-------------------

(Note) The photos above are for motor installed on top (MOT).

Stroke

Stroke (mm)	S4□CR	DS4□CR	Stroke (mm)	S4□CR	DS4□CR
50	<input type="checkbox"/>	<input type="checkbox"/>	200	<input type="checkbox"/>	<input type="checkbox"/>
100	<input type="checkbox"/>	<input type="checkbox"/>	250	<input type="checkbox"/>	<input type="checkbox"/>
150	<input type="checkbox"/>	<input type="checkbox"/>	300	<input type="checkbox"/>	<input type="checkbox"/>

Option

* Please check the Options reference pages to confirm each option.

Name	Option code	Reference page
RCON-EC connection specification (Note 1)	ACR	2-373
Brake	B	2-373
Foot bracket	FT	2-377
Motor mounting direction change (bottom) (Note 2)	MOB	2-381
Motor mounting direction change (left) (Note 2)	MOL	2-381
Motor mounting direction change (right) (Note 2)	MOR	2-381
Motor mounting direction change (up) (Note 2)	MOT	2-381
Non-motor end specification	NM	2-384
PNP specification	PN	2-384
split motor and controller power supply specification	TMD2	2-387
Air suction joint in opposite position	VR	2-388
Battery-less absolute encoder specification	WA	2-388
Wireless communication specification	WL	2-388
Wireless axis operation specification	WL2	2-388

(Note 1) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.
 (Note 2) Be sure to enter a code in the option column for Model Specification Items.

POINT Selection Notes

- "Main Specifications" displays the payload's maximum value. Please refer to "Table of Payload by Speed/Acceleration" for more details.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques listed are only reference values.
- Pay close attention to the installation orientation.
- Reference value of the overhang load length is under 150mm in the Ma, Mb, and Mc directions. Please contact IAI for overhang load lengths.
- The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.

Power / I/O cable length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	<input type="checkbox"/> (Note 3)	<input type="checkbox"/>
1 ~ 3	1~3m	<input type="checkbox"/>	<input type="checkbox"/>
4 ~ 5	4 ~ 5m	<input type="checkbox"/>	<input type="checkbox"/>
6 ~ 7	6 ~ 7m	<input type="checkbox"/>	<input type="checkbox"/>
8 ~ 10	8 ~ 10m	<input type="checkbox"/>	<input type="checkbox"/>

(Note 3) Only terminal block connector is supplied. Please refer to P. 2-394 for details.
 (Note 4) If RCON-EC connection specification (ACR) is selected as an option.
 (Note 5) The robot cable is standard.

4-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 5) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied
S1 ~ S3	1~3m	<input type="checkbox"/>	<input type="checkbox"/>
S4 ~ S5	4 ~ 5m	<input type="checkbox"/>	<input type="checkbox"/>

	Stroke pitch (mm)	50	50	50	50	

(Note 6) The approximate suction amount at maximum speed.

Slider type moment direction

Item	Description
Driving system	Ball screw φ8mm, rolled C10
Positioning repeatability	±0.05mm
Lost motion	- (two-point positioning function; cannot be represented)
Base	Dedicated aluminum extruded material (A6063SS-T5 equivalent), black alumite treatment
Linear guide	Linear motion infinite circulating type
Static allowable moment	Ma: 13.0N-m
	Mb: 18.6N-m
	Mc: 25.3N-m
Dynamic allowable moment (Note 7)	Ma: 5.0N-m
	Mb: 7.1N-m
	Mc: 9.7N-m
Cleanliness	ISO Class 3 (ISO 14644-1 standard)
Ambient operating temperature, humidity	0 ~ 40°C, 85%RH or less (Non-condensing)
Degree of protection	IP20
Vibration & shock resistance	4.9m/s ²
Overseas standards	CE marking, RoHS directive
Motor type	Stepper motor (□35)
Encoder type	Incremental/battery-less absolute
Number of encoder pulses	800 pulse/rev

(Note 7) Based on the standard rated operation life of 5,000km. Operation life varies according to operating and mounting conditions. Confirm the operation life on P. 1-244.

Table of Payload by Speed/Acceleration

Energy-saving setting disabled The unit for payload is kg. If blank, operation is not possible.

- Duty restriction is required, depending on the ambient operating temperature.
- Pay close attention to the installation orientation.
- Reference value of the overhang load length is under 280mm in the Ma, Mb, and Mc directions. Please contact IAI for overhang load lengths.
- The center of gravity of the attached object should be less than 1/2 of the overhang distance. Even when the overhang distance and load moment are within the allowable range, the operating conditions should be moderated if some abnormal vibration or noise is observed.

Power / I/O cable length

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 3) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	○ (Note 2)	○
1 ~ 3	1~3m	○	○
4 ~ 5	4 ~ 5m	○	○
6 ~ 7	6 ~ 7m	○	○
8 ~ 10	8 ~ 10m	○	○

(Note 2) Only terminal block connector is supplied. Please refer to P. 2-394 for details.
 (Note 3) If RCON-EC connection specification (ACR) is selected as an option.
 (Note) The robot cable is standard.

4-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied

Cleanroom specification Cleanliness

Cleanliness is an indicator of how clean a cleanroom is. It is indicated as the "number of dust particles of a certain size or larger within a set volume." The standard was based on United States Federal Standard 209 (1963), but was eliminated in 2001 following the establishment of ISO14644-1 in 1999. Japanese Industrial Standard JIS B 9920 was also revised in 2002 to completely mimic the ISO. The IAI ELECYLINDER® cleanroom specification therefore complies with ISO 14644-1.

Standard	Class	Particle diameter	Standard volume	Remarks
Fed.Std.209D	Class 1, 10, 100 ... 100,000	0.5µm	1ft³	Established in 1963, eliminated in 2001
ISO14644-1	Class 1 to 9	0.1µm	1m³	Established in 1999

The standard regulates the number of dust particles of a certain diameter with a space of a certain size (1m³ or 1ft³)

EC Cleanroom specification

<ISO cleanliness standard>

ISO 14644-1

Particle diameter	0.1 µm					
	Exponential of number of particles in 1m³					
	Upper density [particles/m³]

<IAI method for measuring cleanliness>

As shown in the figure below, the number of dust particles is measured 3 times with the product vertically mounted. The largest number is used as the cleanliness.

Cleanroom specification Cleanroom-compliant suction

Cleanroom-compliant actuators suction air from the suction joint, and are capable of performance compliant with cleanroom/ISO Class 2.5 and 3 (ISO 14644-1 standard). The following table lists the approximate suction amount for each model lead (maximum speed).

- Perform air suction from the 2 suction joints on the side of the body, at the suction amount shown in the following table (total from 2 locations). Adjust the piping so that the suction amount is the same from each location.
- For EC-(D)S□AHCR type, use with all base mounting holes on the bottom surface of the body closed. Any through holes in the body will reduce cleanliness.

Table. Approximate suction amounts

Type	Lead	Suction amount	
	[mm]	[Nℓ/min]	[ℓ/min]

 (Note 2) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

POINT
Selection Notes

- (1) The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to "Table of Payload by Speed/Acceleration" for more details. If the energy-saving setting is enabled, the main specifications will change.
- (2) The value of the horizontal payload assumes that there is an external guide. Please be aware that the anti-rotation stopper can be damaged when an external force is applied to the rod from any direction other than the moving direction.
- (3) If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques are only reference values.
- (4) Duty must be restricted depending on the ambient operating temperature.
- (5) The interface box is not dust-proof or splash-proof. Install in a location not exposed to water.
- (6) Pay close attention to the installation orientation.

Power / I/O Cable Length

(Note) Make sure that the total length of the actuator cable and power I/O cable is 10m or less.

Standard connector cables

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)

Options <small>* Please check the Options reference pages to confirm each option.</small>			
Name	Option code	Reference page	
Actuator cable length: 5m	ACS	2-373	
Actuator cable length: 2m (fluoro-rubber covering specification) (Note 1)	ACF2	2-373	
Actuator cable length: 5m (fluoro-rubber covering specification) (Note 1)	ACF5	2-373	
RCON-EC connection specification (Note 2)	ACR	2-373	
Brake	B	2-373	
Tip adapter (flange)	FFA	2-375	
Flange (front)	FL	2-376	
Foot bracket	FT	2-377	
Designated grease specification	G5	2-381	
Tip adapter (internal thread)	NFA	2-382	
Non-motor end specification	NM	2-384	
PNP specification	PN	2-384	
Fluoro-rubber seal specification (Note 1)	SLF	2-386	
split motor and controller power supply specification	TMD2	2-387	
Battery-less absolute encoder specification	WA	2-388	
Wireless communication specification	WL	2-388	
Wireless axis operation specification	WL2	2-388	

(Note 1) When the "ACF2" or "ACF5" options are selected, the "SLF" option is also supplied. Either one or the other can therefore be selected.
 (Note 2) If the RCON-EC connection specification (ACR) is selected, the PNP specification (PN) and split motor and controller power supply specification (TMD2) cannot be selected.

POINT Selection Notes

- The actuator specifications display the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to "Table of Payload by Speed/Acceleration" for more details. If the energy-saving setting is enabled, the main specifications will change.
- Radial cylinders are equipped with a built-in guide. Please contact IAI for details on the radial load applied to rods.
- The value of the horizontal payload assumes that there is an external guide.
- If performing push-motion operations, refer to the "Correlation between Torque and Current Limit" diagram. The torques are only reference values.
- Duty must be restricted depending on the ambient operating temperature.
- The interface box is not dust-proof or splash-proof. Install in a location not exposed to water.
- Pay close attention to the installation orientation.

Power / I/O Cable Length
 (Note) Make sure that the total length of the actuator cable and power I/O cable is 10m or less.

Standard connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 4) (with connectors on both ends)
		CB-EC-PWBIO□□□-RB supplied	CB-REC-PWBIO□□□-RB supplied
0	No cable	<input type="radio"/> (Note 3)	<input type="radio"/>
1 ~ 3	1 ~ 3m	<input type="radio"/>	<input type="radio"/>
4 ~ 5	4 ~ 5m	<input type="radio"/>	<input type="radio"/>
6 ~ 7	6 ~ 7m	<input type="radio"/>	<input type="radio"/>
8	8m	<input type="radio"/>	<input type="radio"/>

(Note 3) Only terminal block connector is supplied. Please refer to P. 2-394 for details.
 (Note 4) If RCON-EC connection specification (ACR) is selected as an option, (Note) The robot cable is standard.

Four-way connector cable

Cable code	Cable length	User wiring specification (flying leads)	RCON-EC connection specification (Note 5) (with connectors on both ends)
		CB-EC2-PWBIO□□□-RB supplied	CB-REC2-PWBIO□□□-RB supplied
S1 ~ S3	1 ~ 3m	<input type="radio"/>	<input type="radio"/>
S4 ~ S5	4 ~ 5m	<input type="radio"/>	<input type="radio"/>
S6 ~ S7	6 ~ 7m	<input type="radio"/>	<input type="radio"/>
S8	8m	<input type="radio"/>	<input type="radio"/>

(Note 5) If RCON-EC connection specification (ACR) is selected as an option, (Note) The robot cable is standard.

- *1 The length of the actuator cable can be set to 5m as an option.
- *2 The interface box relay section within the dashed line is not dust-proof or splash-proof.
- *3 Make sure that the total length of the actuator's pigtail cable and power I/O cable is 10m or less.
- *4 When the rod is returning to its home position, be careful of possible interference from surrounding objects, as it will travel until it reaches the M.E.
- *5 The direction of width across flats varies depending on the product. Those flats cannot be used for reference plane.

Option

ELECYLINDER® Series Options

Actuator cable length: 5m

Model AC5 Applicable models EC-R6□W / R7□W / RR6□W / RR7□W

Description Although the standard length of the actuator cable of the dust-proof/splash-proof type is 2m, it can be changed to 5m as an option.
 *Make sure that the total length of the actuator cable and power / I/O cable 10m or less.
 (If an actuator cable length of 5m (AC5) is selected, the power / I/O cable must be no longer than 5m.)

Actuator cable length change (fluoro-rubber covering specification)

Model ACF2 / ACF5 Applicable models EC-R6□W / R7□W / RR6□W / RR7□W

Description Select this to change sealing materials from NBR (nitrile rubber) to FKM (fluoro-rubber), and the actuator cable covering from PVC (polyvinyl chloride) to FKM (fluoro-rubber). The cable length will be 2m (ACF2) or 5m (ACF5).

RCON-EC connection specification *Cannot be selected with the TMD2 and PN options (the ACR option includes the split motor and controller power supply specification)

Model ACR Applicable models All models

Description This option should be selected to connect over an R-unit to a field network.
 *If this option is selected, the power supply must be a split motor and controller power supply specification and the input/output specification must be NPN. Therefore, it cannot be selected with the TMD2 or PN options.

Brake

Model B Applicable models All models

Description When the actuator is mounted vertically, this works as a holding mechanism that prevents the slider or rod from falling and damaging any attachments when the power or servo is turned off. When using the rotary on its side or vertically, this holding mechanism also prevents the output shaft from accidentally rotating due to the weight of the attached object, and damaging the attached object when the power or servo is turned off.

Air cylinder mounting plates

Model CS

Description These plates provide compatibility for mounting with some models of rodless air cylinders.
 Plates can be mounted to the slider carriage and actuator base to align their heights with the slider on an air cylinder.
 *Not shipped assembled. Assembly required.
 (Note 1) Selecting CS will reduce the payload by 1kg.
 (Note 2) Cannot be side mounted, invert mounted, or vertically mounted.

- ◆ Additional accessories
 - Hex socket bolts (for mounting to the slider carriage): M5×10 (4 bolts)
 - Parallel pin: φ5×8 type B h7 (2 pins)
 - Hex socket bolts (for mounting to the actuator base): M5×35 (no. of bolts shown in following table)
 - Square nuts: □8×4 M5 (no. of nuts shown in following table)

Digital speed controller installation direction

Model DL/DR

Description This code specifies the installation orientation of the digital speed controller for types with digital speed controllers. The left side and right side are indicated with DL and DR, respectively, when looking from the motor side. Be sure to enter a code in the model number.

Hanging fixture

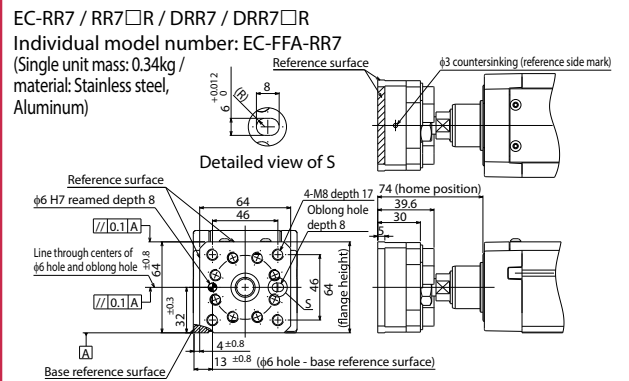

Model EB **Applicable models** EC-S15X

Description This is a set of a hanging fixture and an eye bolt for lifting the actuator for installation. The left side and right side are indicated with DL and DR, respectively, when looking from the motor side. Be sure to enter a code in the model number.

Tip adapter (flange)

Model FFA **Applicable models** EC-RR/DRR (all models)

Description This adapter is used to mount jigs, etc., on the rod tip with four bolts.

Flange (front)

Model **FL** **Applicable models** EC-R / RR / DR / DRR (all models)

Description This bracket is used for mounting the actuator at the non-motor side, using bolts.
 *Not assembled before shipment. Refer to the drawings for mounting instructions.
 However, it will be shipped with flange front "FL" assembled if selected with tip adapter (flange) "FFA."

EC-R6 / DR6 / R6□W
 Individual model number: EC-FL-R6
 (Single unit mass: 0.30kg / material: Steel [Bright chromate])

Values in brackets are for the waterproof type (R6□W).

EC-R7 / DR7 / R7□W
 Individual model number: EC-FL-R7
 (Single unit mass: 0.49kg / material: Steel [Bright chromate])

Values in brackets are for the waterproof type (R7□W).

EC-RR3 / RR3□R / DRR3 / DRR3□R
 Individual model number: EC-FL-RR3
 (Single unit mass: 0.05kg / material: Aluminum)

Cable fixing bracket (front)

Model **FST** **Applicable models** All models

Description This is a bracket used to fix the cable near the connector with a cable tie. The teaching port can be accessed even with the fixing bracket mounted. (However, the teaching port cannot be accessed when the cable exit direction is on the teaching port side, due to interference.)
 *Not assembled before shipment. Refer to the drawings for mounting instructions.
 When fixing the gripper on mounting surface A, co-fasten with the cable fixing bracket.

EC-GRB8 Individual model number EC-FST-GRB8
 (Individual weight: 0.1 kg / Material: Stainless steel)

- u Accessories other than fixing brackets
- Flange head hex bolts (stainless steel): M4 x 6 (4 pcs)
 - Cable tie (1 pc)

EC-GRB10/GRB13 Individual model number EC-FST-GRB1013
 (Individual weight: 0.11 kg / Material: Stainless steel)

- Flange head hex bolts (stainless steel): M6 x 10 (4 pcs)
 - Cable tie (1 pc)

Foot bracket

Model **FT** **Applicable models** (Excluding S□AH / DS□AH / S□AHCR / DS□AHCR / RR□AH / DRR□AH)
 S / R / RR / DS / DR / DRR (all models)

Description This bracket is used for mounting the actuator body from the top with bolts.
 *Not assembled before shipment. Refer to the drawings for mounting instructions.
 Values in brackets are dimensions with digital speed controller.

Designated grease specification

Model **G1 / G5** **Applicable models** G1 : EC-(D)S3 / (D)S4 / (D)S6 / (D)S7 / (D)S6□AH / (D)S7□AH
G5: All models (except for Rotary, Stopper, Clean room specification)
Description Grease for actuator ball screw, linear guide and rod sliding surface is changed to low dust grease for clean environment (Kuroda C grease) for model G1, and food machinery grease (White Algorism grease) for model G5.

Guide mounting direction / table mounting direction

Model **GT2 / GT3 / GT4** **Applicable models** EC-GS4 / TC4 / TC5
Description Select the guide shaft position of EC-GS4 and the table position of EC-TC4.
 Be sure to enter a code in the model number.

Motor side-mounted direction

Model **ML / MR** **Applicable models** Side-mounted motor specification
Description This code is for specifying the motor side-mounted direction for side-mounted motor type actuators.
 As viewed from the motor-side of the actuator, side-mounting to left is ML and right is MR.

Motor mounting direction change

Model **MOB / MOL / MOR / MOT** **Applicable models** EC-S3 / S4 / RR3 / RR4 / DS3 / DS4 / DRR3 / DRR4
Description One of four motor mounting directions can be selected: bottom, left, right, or top.
 * Be sure to enter a code in the model number.

Knuckle joint

Model **NJ** **Applicable models** EC-RR3 / RR4 / RR6 / RR7 / DRR3 / DRR4 / DRR6 / DRR7 (all models)

Description The knuckle joint gives rotational freedom of movement to the rod tip when clevis or trunnion brackets are used. It should be used as a set with a clevis bracket (QR or QRPB).

EC-RR3 / RR3□R / DRR3 / DRR3□R
Single unit model EC-NJ-RR3 (Single unit mass: 0.13kg / Material: stainless steel)

*It is not assembled for shipment. The customer is to mount according to the drawing.
It is recommended that the adjustment standard be within the parallelism specified in the drawing.

EC-RR4 / RR4□R / DRR4 / DRR4□R
Single unit model EC-NJ-RR3 (Single unit mass: 0.14kg / Material: stainless steel)

*It is not assembled for shipment. The customer is to mount according to the drawing.
It is recommended that the adjustment standard be within the parallelism specified in the drawing.

EC-RR6 / RR6□R / DRR6 / DRR6□R
Individual model number: EC-NJ-RR6 (Single unit mass: 0.27kg / Material: stainless steel)

*Not assembled before shipment. Refer to the drawing for mounting instructions.
When making adjustments, it is recommended that the parallelism fall within the level mentioned on the drawings provided.

EC-RR7 / RR7□R / DRR7 / DRR7□R
Individual model number: EC-NJ-RR7 (Single unit mass: 0.28kg / Material: stainless steel)

*Not assembled before shipment. Refer to the drawing for mounting instructions.
When making adjustments, it is recommended that the parallelism fall within the level mentioned on the drawings provided.

EC-RR6□AH / RR6□AHR / DRR6□AH / DRR6□AHR
Individual model number: EC-NJ-RR6 (Single unit mass: 0.27kg / Material: stainless steel)

*Not assembled before shipment. Refer to the drawing for mounting instructions.
When making adjustments, it is recommended that the parallelism fall within the level mentioned on the drawings provided.

EC-RR7□AH / RR7□AHR / DRR7□AH / DRR7□AHR
Individual model number: EC-NJ-RR7 (Single unit mass: 0.28kg / Material: stainless steel)

*Not assembled before shipment. Refer to the drawing for mounting instructions.
When making adjustments, it is recommended that the parallelism fall within the level mentioned on the drawings provided.

Knuckle joint + oscillation receiving bracket

Model **NJPB** **Applicable models** EC-RR3 / RR4 / RR6 / RR7 / DRR3 / DRR4 / DRR6 / DRR7 (all models)

Description This is a knuckle joint and oscillation receiving bracket. It should be used as a set with a clevis bracket (QR or QRPB).

Non-motor end specification

Model **NM** **Applicable models** Models other than EC-RP4 / GS4 / GD4 / RP5 / GD5

Description The home position is normally located on the motor side. This option reverses the home position to the opposite end in order to accommodate equipment variations and the facility layout.

PNP specification * Cannot be selected with ACR option, which must be the NPN specification.

Model **PN** **Applicable models** All models

Description EC Series provides NPN specification input/output for connecting external devices as standard. Specifying this option changes input/output to the PNP specification.

Clevis bracket

Model QR Applicable models EC-RR3 / RR4 / RR6 / RR7 / DRR3 / DRR4 / DRR6 / DRR7 (all models)

Description When the object mounted to the rod tip moves in a direction other than the rod operation direction, this bracket allows the actuator body to follow that movement. It should be used as a set with a knuckle joint (NJ or NJPB).

EC-RR3 / RR3□R / DRR3 / DRR3□R
 Individual model number: EC-QR-RR3
 (Single unit mass: 0.19kg / Material: stainless steel & Iron)
 *It is not assembled for shipment. The customer is to mount according to the drawing.
 It is recommended that the adjustment standard be within the parallelism specified in the drawing.

Sectional view S-S

EC-RR4 / RR4□R / DRR4 / DRR4□R
 Individual model number: EC-QR-RR4
 (Single unit mass: 0.21 kg / Material: stainless steel & Iron)
 *It is not assembled for shipment. The customer is to mount according to the drawing.
 It is recommended that the adjustment standard be within the parallelism specified in the drawing.

Sectional view S-S

EC-RR6 / RR6□R / DRR6 / DRR6□R
 Individual model number: EC-QR-RR6
 (Single unit mass: 0.35kg / Material: stainless steel)
 *Not assembled before shipment. Refer to the drawing for mounting instructions.
 When making adjustments, it is recommended that the parallelism fall within the level mentioned on the drawings provided.

Cross section of S-S

EC-RR7 / RR7□R / DRR7 / DRR7□R
 Individual model number: EC-QR-RR7
 (Single unit mass: 0.44kg / Material: stainless steel)
 *Not assembled before shipment. Refer to the drawing for mounting instructions.
 When making adjustments, it is recommended that the parallelism fall within the level mentioned on the drawings provided.

Cross section of S-S

EC-RR6□AH / RR6□AHR / DRR6□AH / DRR6□AHR
 Individual model number: ECH-QR-RR6
 (Single unit mass: 0.93kg / Material: stainless steel & aluminum)
 *Not assembled before shipment. Refer to the drawing for mounting instructions.
 When making adjustments, it is recommended that the parallelism fall within the level mentioned on the drawings provided.

Cross section of S-S

EC-RR7□AH / RR7□AHR / DRR7□AH / DRR7□AHR
 Individual model number: ECH-QR-RR7
 (Single unit mass: 1.13kg / Material: stainless steel & aluminum)
 *Not assembled before shipment. Refer to the drawing for mounting instructions.
 When making adjustments, it is recommended that the parallelism fall within the level mentioned on the drawings provided.

Cross section of S-S

Clevis bracket + oscillation receiving bracket

Model QRPB **Applicable models** EC-RR3 / RR4 / RR6 / RR7 / DRR3 / DRR4 / DRR6 / DRR7 (all models)

Description This is a clevis and oscillation receiving bracket. The method for mounting the oscillation receiving bracket is the same as for NJPB. It should be used as a set with a knuckle joint (NJ or NJPB).

<p>EC-RR6 / RR6□R / DRR6 / DRR6□R Individual model number: EC-QRPB-RR3 (Single unit mass: 0.32kg / Material: stainless & iron)</p>	<p>EC-RR7 / RR7□R / DRR7 / DRR7□R Individual model number: EC-QRPB-RR4 (Single unit mass: 0.34kg / Material: stainless & iron)</p>

Shaft adapter

Model SA **Applicable models** EC-RTC9 / RTC12

Description This adapter is used to mount jigs to the rotary table. Refer to the dimensions on the individual product page for detailed dimensions.

For EC-RTC9, Individual model number: EC-SA-RTC9 (Single unit mass: 0.06kg / Material: steel [nickel plated])
Moment of inertia: $0.006 \times 10^{-3} \text{kg}\cdot\text{m}^2$

For EC-RTC12, Individual model number: EC-SA-RTC12 (Single unit mass: 0.16kg / Material: steel [nickel plated])
Moment of inertia: $0.05 \times 10^{-3} \text{kg}\cdot\text{m}^2$

Fluoro-rubber seal specification

Model SLF **Applicable models** EC-R6□W / R7□W / RR6□W / RR7□W

Description Select this to change the sealing material from NBR (nitrile rubber) to FKM (fluoro-rubber).

Slider part roller specification

Model SR **Applicable models** EC-(D)S3(R) / (D)S4(R) / (D)S6(R) / (D)S7(R) / (D)S6□AH(R) / (D)S7□AH(R)

Description Standard slider type construction is changed to the roller construction same as clean specification. When changed to the slider part roller specification, the external view of the slider cover becomes the same type as that of the clean specification.

Slider spacer

Model **SS** **Applicable models** DS6□R / DS7□R / DS6□AHR / DS7□AHR

Description This option adds an adapter plate, which increases the slider's height to be taller than the motor's height.

For EC-DS6□R, Individual model number: EC-SS-DS6
(Single unit mass: 0.19kg / Material: aluminum)

For EC-DS7□R, Individual model number: EC-SS-DS7
(Single unit mass: 0.249kg / Material: aluminum)

For EC-DS6□AHR, Individual model number: EC-SS-DS6
(Single unit mass: 0.19kg / Material: aluminum)

For EC-DS7□AHR, Individual model number: EC-SS-DS7
(Single unit mass: 0.19kg / Material: aluminum)

Table adapter

Model **TA** **Applicable models** EC-RTC9 / RTC12

Description This adapter is used to mount jigs to the rotary table. Refer to the dimensions on the individual product page for detailed dimensions.

For EC-RTC9, Individual model number: EC-TA-RTC9
(Single unit mass: 0.08kg / Material: aluminum)
Moment of inertia: $0.04 \times 10^{-3} \text{kg} \cdot \text{m}^2$

For EC-RTC12, Individual model number: EC-TA-RTC12
(Single unit mass: 0.13kg / Material: aluminum)
Moment of inertia: $0.11 \times 10^{-3} \text{kg} \cdot \text{m}^2$

Split motor and controller power supply specification * Cannot be selected with the ACR option (the RCON-EC connection specification is a split motor and controller power supply specification)

Model **TMD2** **Applicable models** All models

Description This option provides separate power for the motor and controller.
Select this option to allow shutting down the actuator drive power only.
Please refer to P. 2-394 for more information on wiring.
Although EC-S10 / S10X / S13 / S13X / S15 / S15X provides actuator operation stop input, drive power shutoff is not performed.
Please refer to P. 2-401 for details.

Cable fixing bracket (top)

Model TST **Applicable models** All models

Description This is a bracket used to fix the cable near the connector with a cable tie. The teaching port can be accessed even with the fixing bracket mounted.
 *Can be selected only when selecting the 4-way connector cable.
 *Not assembled before shipment. Refer to the drawings for mounting instructions.
 When fixing the gripper on mounting surface A, co-fasten with the cable fixing bracket.

EC-GRB8 Individual model number EC-TST-GRB8
 (Individual weight: 0.06kg / Material: Stainless steel)

- u Accessories other than fixing brackets
- Flange head hex bolts (stainless steel): M4 x 6 (4 pcs)
 - Cable tie (1 pc)

EC-GRB10/GRB13 Individual model number EC-TST-GRB1013
 (Individual weight: 0.06kg / Material: Stainless steel)

- u Accessories other than fixing brackets
- Flange head hex bolts (stainless steel): M6 x 10 (4 pcs)
 - Cable tie (1 pc)

Suction joint on the opposite side

Model VR **Applicable models** clean specification all models

Description The joint for vacuum is mounted on the left side viewing from the motor side. This option enables to change it to the opposite side.

Double slider

Model W **Applicable models** EC-(D)S6□(R) / (D)S7□(R) / (D)S6□AH(R) / (D)S7□AH(R)

Description This option enables to add a free slider that is not connected to the screw. The double slider allows to increase allowable moment and overhang length.

Battery-less absolute encoder specification

Model WA **Applicable models** (all models excluding EC-GRB8/S10/S10X/S13/S13X/S15/S15X)

Description Incremental encoder specification is standard for the EC Series. Specifying this option installs a built-in battery-less absolute encoder. EC-GRB8 uses only an incremental encoder. This option cannot be selected. EC-S10 / S10X / S13 / S13X / S15 / S15X are equipped standard with a battery-less absolute encoder. This item is not necessary.

Wireless communication specification

Model WL **Applicable models** All models

Description This option enables support for wireless communication. Specifying this option enables wireless connection with the TB-03 teaching pendant. The start point, end point, and AVD can be adjusted via wireless communication.

Wireless axis operation specification

Model WL2 **Applicable models** All models

Description Specifying WL2 all of the wireless features of the WL option (adjusting the start point, end point, and the AVD) are available, and test operations of axis movement (forward/backward movement, jogging, and inching) are also possible. However, this function is not meant to perform automatic or continuous operation. Refer to P. 2-436 for precautions on axis operations using a wireless connection. (Note) Customers cannot change WL to WL2, or WL2 to WL. Please contact IAI for this.

Built-in controllers

Basic Controller Specifications

Specification item		Specification content	
Number of controlled axes		1 axis	
Power supply voltage		24VDC ±10%	
Power capacity (including control power of 0.3A)	GRB8	Maximum 1A (only for energy-saving enabled)	
	RP4, GS4, GD4, TC4, TW4, GRB10/13, RTC9	Max. 2A (with energy-saving setting enabled only)	
	(D)S3(□CR), (D)RR3	Max. 2.2A (with energy-saving setting enabled only)	
	Other than the above	With energy-saving setting disabled: Rated 3.5A, max. 4.2A With energy-saving setting enabled: Max. 2.2A	
Brake release power sup		24VDC ±10%, 200mA (only for external brake release)	
Heat quantity (at duty ratio 100%)	GRB8	2W	
	(D)S3(□CR), (D)RR3, RP4, GS4, GD4, TC4, TW4, GRB10/13, RTC9	5W	
	Other than the above	8W	
Inrush current (Note 1)	(D)S3(□CR), (D)RR3, RP4, GS4, GD4, TC4, TW4, GRB8/10/13, RTC9	2A	
	Other than the above	8.3A (with inrush current limit circuit)	
Momentary power failure resistance		max 500μs	
Motor size		□20, □28, □35, □42, □56	
Motor rated current	GRB8	0.4A	
	Other than the above	1.2A	
Motor control system		Weak field-magnet vector control	
Supported encoders		Incremental (800 pulse/rev), battery-less absolute encoder (800 pulse/rev)	
SIO		RS485 1ch (Modbus protocol compliant)	
PIO	Input specification	Number of inputs	3 points (forward, backward, alarm clear)
		Input voltage	24VDC ±10%
		Input current	5mA per circuit
		Leakage current	Max. 1mA per point
		Isolation method	Non-isolated
	Output specification	No. of outputs	3 points (forward complete, backward complete, alarm)
		Output voltage	24VDC ±10%
		Output current	50mA per point
		Residual voltage	2V or less
		Isolation method	Non-isolated
Data setting, input method		PC teaching software, touch panel teaching pendant, digital speed controller	
Data retention memory		Position and parameters are saved in non-volatile memory (no limit to rewrite)	
LED display	Controller status display	Servo ON (green light ON) / Alarm (red light ON) / Initializing when power comes ON (orange light ON) / Minor failure alarm (green/red alternately blinking) / Operation from teaching: Stop from teaching (red light ON) / Servo OFF (light OFF)	
	Wireless status display	Initializing wireless hardware, without wireless connection, or connecting from TP board (light OFF) / Connecting through wireless (green blinking) / Wireless hardware error (red blinking) / Initializing when power comes ON (orange light ON)	
Predictive maintenance/preventative maintenance		When the number of movements or operation distance has exceeded the set value and when the LED (right side) blinks alternately green and red at overload warning *Only when configured in advance	
Ambient operating temperature		0 ~ 40°C	
Ambient operating humidity		85% RH or less (non-condensing or freezing) Operating ambience	
Operating ambience		No corrosive gas and excessive dust	
Insulation resistance		500VDC 10MΩ	
Electric shock protection mechanism		Class 1 basic insulation	
Cooling method		Natural air cooling	

(Note 1) Inrush current flows for approximately 5ms after the power is input. Inrush current (at 40°C) value differs depending on the impedance on the power line.

Solenoid valve system

ELE CYLINDER is usually the double solenoid system.

To change it to the single solenoid system, change the parameter No.9 "Selection of solenoid valve system."

<Note>

The single solenoid system cannot be operated when connecting to RCON-EC.

I/O (Input/Output) Specifications

I/O		Input		Output	
Specifications	Input voltage	24VDC ±10%		Load voltage	24VDC ±10%
	Input current	5mA per circuit		Maximum load current	50mA per point
	ON/OFF voltage	ON voltage: MIN. 18VDC OFF voltage: MAX. 6VDC		Residual voltage	2V or less
	Leakage current	MAX. 1mA per point		Leakage current	MAX. 0.1mA per point
Isolation method		Non-isolated from external circuit		Non-isolated from external circuit	
I/O logic	NPN				
	PNP				

(Note) Isolation method is non-isolated. When connecting an external device (such as a PLC) to ELECYLINDER®, use the same ground as ELECYLINDER®.

I/O Signal Wiring Diagram

I/O Signal Table

Power / I/O connector pin assignment			
Pin No.	Connector nameplate name	Signal abbreviation	Function overview
B3 (Note 1)	Backward	ST0	Backward command
B4 (Note 1)	Forward	ST1	Forward command
B5	Alarm cancel	RES	Alarm cancel
A3	Backward complete	LS0/PE0	Backward complete/push complete
A4	Forward complete	LS1/PE1	Forward complete/push complete
A5	Alarm	*ALM	Alarm detection (b-contact)
B2	Brake release	BKRLS	Brake forced release (for brake equipped specification)
B1 (Note 2)	24V	24V	24V input
A1	0V	0V	0V input
A2 (Note 2)	(24V)	(24V)	24V input

(Note 1) For the single solenoid system, B3 is "Forward/Backward command" and B4 is "Not used." However, indication of the power-I/O connector remains unchanged from B3: Backward and B4: Forward.
 (Note 2) For the split motor and controller power supply specification (TMD2), B1 is 24V (drive) and A2 is 24V (control).

Options

Wireless/wired touch panel teaching pendant

- Features** This teaching device supports wireless connections. Start point/end point/AVD input and axis operation can be performed wirelessly.

Model **TB-03-** Please contact IAI for the current supported versions.

- Configuration** Wireless or wired connection

Specifications

Rated voltage	24VDC
Power consumption	3.6W or less (150mA or less)
Ambient operating temperature	0 ~ 40°C
Ambient operating humidity	20 ~ 85%RH (Non-condensing)
Environmental resistance	IPX0
Mass	Approx. 485g (body) + approx. 175g (battery)
Charging method	Wired connection with dedicated adapter/controller
Wireless connection	Bluetooth 4.2 class 2

PC teaching software (RC/EC Software)

- Features** This start-up support software provides functions such as position teaching, trial operation, and monitoring. It provides a complete range of functions required to make adjustments, to help reduce start-up time.

* Please purchase through your distributor and a download link will be sent to your valid email address.

- Model** **IA-O-S** (software only, for customers who already own a dedicated connection cable)

Configuration

Please contact IAI for the current supported versions.

Supported Windows versions: 7/10

- Model** **IA-O-C** (with an external device communication cable + USB conversion adapter + USB cable)

Configuration

Please contact IAI for the current supported versions.

Maintenance Parts

When placing an order for a replacement cable, please use the model name shown below.

Table of compatible cables

Cable type	Cable model
Power / I/O cable (user-wired specification)	CB-EC-PWBIO□□□-RB
Power / I/O cable (user-wired specification, four-way connector)	CB-EC2-PWBIO□□□-RB
Power / I/O cable (RCON-EC connection specification)	CB-REC-PWBIO□□□-RB
Power / I/O cable (RCON-EC connection specification, four-way connector)	CB-REC2-PWBIO□□□-RB

Model CB-EC-PWBIO□□□-RB

*Please indicate the cable length (L) in □□□ (for example, 030 = 3m)

Minimum bending R: r=58mm or more (dynamic bending condition)
*Only the robot cable is available for this model.

Table of specifications

■ Four-way connector cable

This cable allows the connector direction to be changed to any of 4 directions.

The cable wiring for the connector is the same as that of power I/O cable CB-EC-PWBIO□□□-RB.

Model: CB-EC2-PWBIO□□□-RB

Cable direction can be set to any of 4 directions

- The wiring on the side opposite the connector is left unprepared.
- The cable length may be from 1m to 10m long. The length can be specified in 1m units.
- Example models are listed below.

Cable length 1m → CB-EC2-PWBIO010-RB

Cable length 3m → CB-EC2-PWBIO030-RB

Cable length 10m → CB-EC2-PWBIO100-RB

Follow the procedure below to assemble the connector in the desired direction.

(1) Insert while sliding along the groove in the desired direction from the semi-cylindrical curved portion.

(2) Confirm that the cable has been firmly inserted, and then insert the 2 sides of the lid along the groove.

(3) Finally, press the remaining side of the lid.

List of Accessories

■ Power / I/O cable

Product category		Accessory
Power / I/O cable length (selected with actuator model)	RCON-EC connection specification (ACR) selection	
0	No	Power / I/O connector (1-1871940-6)
	Yes	—
1 ~ 10	No	Power / I/O cable (CB-EC-PWBIO□□□-RB)
	Yes	Power / I/O cable (CB-REC-PWBIO□□□-RB)

■ Motor power supply cable

Product category		Accessory
Motor power supply cable length (selected with actuator model)	RCON-EC connection specification (ACR) selection	
0	No	—
	Yes	—
1 ~ 10	No	Motor power supply cable (CB-EC-PW□□□-RB)
	Yes	Motor power supply cable (CB-EC-PW□□□-RB)

Basic Controller Specifications

Specification item		Specification content		
Number of controlled axes		1 axis		
Motor power input voltage		Supplied from PSA-200 (280VDC typ)		
Control power input voltage		24VDC ±10%		
Control power current	Control	320mA		
	Teaching (Note 1)	150mA		
	Brake (Note 2)	S10(X)	220mA (No over-excitation)	
		S13(X), S15(X)	Over-excitation: 875mA, Normal: 85mA	
Control power capacity	Control	7.6W		
	Teaching (Note 1)	3.6W		
	Brake (Note 2)	S10(X)	5.3W (No over-excitation)	
		S13(X), S15(X)	Excitation: 21.0W, Normal: 2.0W	
Inrush current		-		
Momentary power failure resistance		Max 500μs		
Compatible motor wattage (W)		100W/200W/400W		
Motor control system		Sine wave PWM vector current control		
Supported encoders		Battery-less absolute encoder (16,384 pulses/rev)		
SIO		RS485 1ch (Modbus protocol compliant)		
PIO	Input specification	Number of inputs	points (forward, backward, alarm clear)	
		Input voltage	24VDC ±10%	
		Input current	5mA per circuit	
		Leakage current	Max. 1mA per point	
		Isolation method	Non-isolated	
	Output specification	No. of outputs	3 points (forward complete, backward complete, alarm)	
		Output voltage	24VDC ±10%	
		Output current	50mA per point	
		Residual voltage	2V or less	
		Isolation method	Non-isolated	
Data setting, input method		PC teaching software, touch panel teaching pendant		
Data retention memory		Position and parameters are saved in non-volatile memory (no limit to rewrite)		
LED display	Controller status display (right)	Servo ON (green light ON) / Alarm (red light ON) / Initializing when power comes ON (orange light ON) / Minor failure alarm (green light blinking) / Operation from teaching: Stop from teaching (red light ON) / Servo OFF (light OFF)		
	Motor power status display (middle)	Motor power ON (green light on) / Motor power OFF (green light blinking)		
	Wireless status display (left)	Initializing wireless hardware, without wireless connection, or connecting from TP board (light OFF) Connecting through wireless (green blinking) / Wireless hardware error (red blinking) / Initializing when power comes ON (orange light ON)		
	Charge status display (I/O connector yellow)	Internal circuit charged (red light on) / Internal circuit not charged (off) (Note 3)		
Predictive maintenance/preventative maintenance		When the number of movements or operation distance has exceeded the set value and when the LED (right side) blinks green at overload warning *Only when configured in advance		
Ambient operating temperature		0 ~ 40°C		
Ambient operating humidity		85% RH or less (no condensation or freezing)		
Operating ambience		No corrosive gas and excessive dust		
Insulation resistance		500VDC 10MΩ		
Electric shock protection mechanism		Class 1 basic insulation		
Cooling method		Natural air cooling		

(Note 1) Add this if connecting a teaching pendant.

(Note 2) Add this if using an actuator with brake.

(Note 3) When the charge status display LED is on, it means that the controller is internally charged. To prevent electric shock when wiring or conducting an inspection, shutdown the power and confirm that the LED is off.

Solenoid valve system

ELE CYLINDER is usually the double solenoid system.

To change it to the single solenoid system, change the parameter No.9 "Selection of solenoid valve system."

<Note>

The single solenoid system cannot be operated for RCON-EC.

Built-in controllers

I/O (Input/Output) Specifications

I/O		Input		Output	
Specifications	Input voltage	24VDC ±10%		Load voltage	24VDC ±10%
	Input current	5mA per circuit		Maximum load current	50mA per point
	ON/OFF voltage	ON voltage: MIN. 18VDC OFF voltage: MAX. 6VDC		Residual voltage	2V or less
	Leakage current	MAX. 1mA per point		Leakage current	MAX. 0.1mA per point
Isolation method		Non-isolated from external circuit		Non-isolated from external circuit	
I/O logic	NPN				
	PNP				

(Note) Isolation method is non-isolated. When connecting an external device (such as a PLC) to ELECYLINDER®, use the same ground as ELECYLINDER®.

I/O Signal Wiring Diagram

I/O		Standard specification	Split motor and controller power supply specification (option model: TMD2)
Power / I/O connector		<p>0V A1 (Reserved) A2 Backward complete A3 Forward complete A4 Alarm output A5 (Reserved) A6</p> <p>B1 24V B2 Brake release B3 Backward command (Note 1) B4 Forward command (Note 1) B5 Alarm cancel B6 (reserved)</p>	<p>0V A1 24V (control) A2 Backward complete A3 Forward complete A4 Alarm output A5 (Reserved) A6</p> <p>B1 24V (stop)* B2 Brake release B3 Backward command (Note 1) B4 Forward command (Note 1) B5 Alarm cancel B6 (reserved)</p>
I/O logic	NPN	<p>0V 24V</p> <p>(Note 1) Backward command B3 A3 Backward complete (Note 1) Forward command B4 A4 Forward complete Alarm cancel B5 A5 Alarm output</p>	<p>0V 24V</p> <p>(Note 1) Backward command B3 A3 Backward complete (Note 1) Forward command B4 A4 Forward complete Alarm cancel B5 A5 Alarm output</p>

(Note 1) For the single solenoid system, B3 is "Forward/Backward command" and B4 is "Not used."

I/O Signal Table

Power / I/O connector pin assignment			
Pin No.	Connector nameplate name	Signal abbreviation	Function overview
B3 (Note 1)	Backward	ST0	Backward command
B4 (Note 2)	Forward	ST1	Forward command
B5	Alarm cancel	RES	Alarm cancel
A3	Backward complete	LS0	Backward complete
A4	Forward complete	LS1	Forward complete
A5	Alarm	*ALM	Alarm detection (b-contact)
B2	Brake release	BKRLS	Brake forced release (for brake equipped specification)
B1 (Note 2)	24V	24V	24V input
A1	0V	0V	0V input
A2 (Note 2)	(24V)	(24V)	24V input

(Note 1) For the single solenoid system, B3 is "Forward/Backward command" and B4 is "Not used."

However, indication of the power-I/O connector remains unchanged from B3: Backward and B4: Forward.

(Note 2) For the split motor and controller power supply specification (TMD2), B1 is 24V (stop) and A2 is 24V (control).

Required Option

Motor drive DC power

Features This unit provides drive DC power to the actuator motor. A single unit can provide power for up to 6 axes (within the max. connection wattage (W)).

Model **PSA-200-1**
(Input voltage: Single phase 100VAC, max. 800W connectable)
PSA-200-2
(Input voltage: Single phase 200VAC, max. 1600W connectable)

Configuration Connected with motor power supply cable

Main power supply
Single phase 100VAC
Single phase 200VAC

*When connecting power, be sure to use a noise filter.

<Recommended models>
NF2010A-UP (manufacturer: Soshin Electric)
NAC-10-472 (manufacturer: COSEL)

Actuator-mounted motor wattage (W)

EC-S10/S10X	100W
EC-S13/S13X	200W
EC-S15/S15X	400W

Names of each part

- 1 Fan unit
- 2 Status output connector
- 3 Status display LED
- 4 Regenerative resistance unit cable connector
- 5 Power supply connector
- 6 Ground terminal
- 7 Charge status display LED*1
- 8 Motor power connector

(*1) When the charge status display LED is on, it means that PSA-200 is internally charged. To prevent electric shock when wiring or conducting an inspection, shutdown the power and confirm that the LED is off.

Specifications

Power input voltage range	Single phase 100VAC specification: 100 ~ 115VAC ±10% Single phase 200VAC specification: 200 ~ 230VAC ±10%
Input frequency range	50/60Hz ±5%
Inrush current (Note 1)	55°C Control power: 60A Motor power: 70A
Output voltage	DC280V typ
Max. motor connection wattage (W)	Single phase 100VAC specification: 800W Single phase 200VAC specification: 1600W
Max. number of driven axes	6 axes
Momentary power failure resistance	50Hz: 20ms, 60Hz: 16ms
Dielectric withstand voltage	Between primary and FG: 1500VAC for 1 min.
Insulation resistance	Between secondary and FG: 500VDC 10MΩ or higher
Leakage current	Total 3.1mA (using recommended noise filter, 6 axes connected)
Electric shock protection mechanism	Class 1 basic insulation

(Note 1) Inrush current flows for approximately 20ms after the power is input. The inrush current value varies depending on the impedance of the power line and internal element temperature (thermistor).

External dimensions

Regenerative resistance unit

- Features** This unit converts the regenerative current generated as the motor decelerates into heat. Calculate the total wattage of the actuator to operate and refer to the "Necessary amount guideline" table to the right. Prepare regenerative resistance if required.
- Model** **RESU-1** (standard specification)/**RESUD-1** (DIN rail mounting specification)

Specifications

Model	RESU-1	RESUD-1
Unit weight	Approx. 0.4kg	
Built-in regenerative resistance value	235Ω 80W	
Unit mounting method	Screw mount	DIN rail mount
Supplied cable	CB-ST-REU010	

External dimensions

Necessary amount guideline

Actuator-mounted motor wattage (W)

EC-S10/S10X	100W
EC-S13/S13X	200W
EC-S15/S15X	400W

Wattage (W)	Horizontal									
	0	200	400	600	800	1000	1200	1400	1600	
Vertical	0	0	0	0	0	0	1	1	1	1

	1200	2	2	3	-	-	-	-	-	-
1400	2	3	-	-	-	-	-	-	-	
1600	3	-	-	-	-	-	-	-	-	

<Caution>

- Values above are for when performing back and forth operation at an actuator operation duty ratio of 50% for a 1000mm stroke at rated acceleration/deceleration and rated load.
- Regenerative energy is also absorbed inside the controller. If the allowance is exceeded, the estimated regenerative discharge power excess alarm will trip. You should therefore connect an additional external regenerative resistance unit. If the operation duty ratio is about 50% or the load is high when vertically mounted, a regenerative resistance unit exceeding the values above will be needed. Note that a maximum of 5 regenerative resistance units may be connected. Never connect more than 5 units as this may cause a failure.

Wireless/wired touch panel teaching pendant

- Features** This teaching device supports wireless connections. Start point/end point/AVD input and axis operation can be performed wirelessly.
- Model** **TB-03** Please contact IAI for the current supported versions.

- Configuration** Wireless or wired connection

Specifications

Rated voltage	24VDC
Power consumption	3.6W or less (150mA or less)
Ambient operating temperature	0 ~ 40°C
Ambient operating humidity	20 ~ 85%RH (Non-condensing)
Environmental resistance	IPX0
Mass	Approx. 485g (body) + approx. 175g (battery)
Charging method	Wired connection with dedicated adapter/controller
Wireless connection	Bluetooth 4.2 class 2

PC teaching software (RC/EC Software)

- Features** This start-up support software provides functions such as position teaching, trial operation, and monitoring. It provides a complete range of functions required to make adjustments, to help reduce start-up time.
- * Please purchase through your distributor and a download link will be sent to your valid email address.

- Model** **IA-OS** (software only, for customers who already own a dedicated connection cable)
Please contact IAI for the current supported versions

Configuration

- Model** **IA-OS-C** (with an external device communication cable + USB conversion adapter + USB cable)
Please contact IAI for the current supported versions

Configuration

Supported Windows versions: 7/10

Maintenance Parts

When placing an order for a replacement cable, please use the model name shown below.

Table of compatible cables

Cable type	Cable model
Power / I/O cable (user-wired specification)	CB-EC-PWBIO□□□-RB

Table of specifications

REC

ELECYLINDER® field network connection unit

REC features

Connect ELECYLINDER® to a field network

This field network connection unit is specifically for use with ELECYLINDER®. It allows up to 16 axes of ELECYLINDER® to be connected via network. It is ideal for saving wiring and space inside the control panel.

EC connection unit
4-axis specification x 4 units =

Max. **16 axes**

Compatibility: No. 1 in the industry with seven field network types supported

Can be connected to various field networks.

EC connection unit can be connected mixed with other driver units connected to RCON

Connect to RCON to allow mixed connections with ROBO Cylinder and single axis robots.

Can communicate using the same gateway unit as other actuators.

Selection method

Please refer to P. 8-35 for information on selecting products when using RCON-GW/GWG products from other series.

*Make sure to select "ACR" as an option for the ELECYLINDER model.

Procedure 1 Select the ELECYLINDER® to connect (up to 16 axes)

*Please be sure to select "ACR" as the option model.

<Selection example>

Procedure 2 Select the EC gateway unit

Select the EC gateway unit based on the network type.

Network type	Gateway unit model
	REC-GW-DV
	REC-GW-CC
	REC-GW-CIE
	REC-GW-PR
	REC-GW-EC
	REC-GW-EP
	REC-GW-PRT

<Selection example>

← Select! 1

Caution Only one EC gateway unit can be connected per system. Split this among two or more units to connect 17 or more axes or if the power capacity is exceeded.

Example: When connecting 20 axes

Procedure 3 Connect EC connection unit

Up to 4 axes of ELECYLINDER® can be connected to one EC connection unit.

Select the required number of EC connection units based on the number of units for connecting ELECYLINDER®.

Actuator	EC connection unit			<Selection example>		
	Series	External view	Number of axes connected to actuator	Model	Classification	Required units
EC			4-axis specification	RCON-EC-4		2 units ← Select! 2

Step 4 Calculation of control power capacity (CP)

Confirm that the total control power capacity of each unit connected to REC and ELECYLINDER is less than the value specified below.

Item	Average current
Control power (CP)	Less than 9.0A

How to check

Add up referring to the "Control power capacity table" below.

Item	Specification	Power source current		
Control power capacity	Master unit		0.8A	
	EC connection unit		0.1A	
	24V specification ELECYLINDER (per unit)	Without brake		0.3A
		With brake		0.5A
	200V specification ELECYLINDER (per axis)	Without brake		0.32A
		With brake	EC-S10□/S10X□	0.54A
			EC-S13□/S13X□ EC-S15□/S15X□	1.2A

x 2 axes
x 4 axes
x 2 axes

x 1 axis

* Power capacity of the master unit is not included in calculation.

<Selection example>

(It is confirmed that the current is less than 9.0A. If it is greater than 0.9A, another gateway unit is needed.)

Built-in controllers

Control-related devices

REC RCON-EC

PSA-24

TB-03

TB-03E

/02E

Step 5 Calculation of motor power capacity (MP)

Make sure that the total motor power capacity of the units connected to REC is as follows.

Item	Average current
Motor power (MP)	37.5A or less

How to check

Add up while checking the "Motor power capacity list" below.
 If the maximum current is listed, add the maximum current.
 If not, add the rated current.

Motor power capacity list

Item	Actuator / connection unit			Power source current			
	Series	Motor type	Type	Energy-saving disabled		Energy-saving enabled	
				Rate current	Maximum		
Motor power capacity (per 1-axis actuator)	24V stepper motor	EC	35P/42P/56P	Other than the below	2.3A	3.9A	1.9A
			28P	S3□/RR3□	-	-	1.9A
				RP4/GS4/GW4/TC4/TW4/RTC9/GRB10/GRB12	-	-	1.7A
				GRB8	-	-	0.7A

<Selection example>

x 4 axes
 x 1 axis
 x 2 axes

<Selection example>

Total
 $3.9A + 3.9A + 1.9A + 1.7A + 1.7A + 3.9A = 17.0A < 37.5A$

OK

(The total was confirmed to be 37.5A or less. If the value is larger than 37.5A, another EC gateway unit is required.)

It is possible to calculate the motor power capacity as in step 5 (calculation when all axes are simultaneously used at maximum load).

Step 6 Selection of 200V specification motor power

When connecting a 200V specification ELECYLINDER, determine the number of power supply units for DC motors according to the total motor wattage.

DC power source for driving motors

Connecting power	Max. connectable axes (per power supply unit)	Max. connecting motor wattage
PSA-200-1 (AC100V)	6 axes	800W
PSA-200-2 (AC200V)	6 axes	1,600W

How to check

Confirm the motor wattage from the actuator specification.

<Selection example>

DC power source (AC100V/200V)

Series	EC-S13
Motor wattage	200W

Total = **200W** < 800W (one unit)

OK

Step 7 Unit models to be ordered

Order using the model name for each unit.

<Selection example>

Order model (x number of units)	Name/specification
REC-GW-CC	EC gateway unit (with terminal unit)
RCON-EC-4 x 2 units	EC connection unit

- 1
- 2

REC

Unit Configuration

REC has a unit-connecting configuration. Every unit has the same connector and locking configuration. However, there are restrictions on unit arrangement. Connect each unit with these restrictions in mind. Connect each prepared unit in order starting from the left, with the EC gateway unit serving as the standard unit when looking at the front surface.

*The system will not operate normally if units are not connected in the following order.

Unit name	Number of connected units	Additional information
EC gateway unit	1	Placed at far left
EC connection unit	(Max.) 4	Can be rearranged within the unit (up to 16 axes can be connected)
Terminal unit	1	Placed at far right

Product name		Model	Reference page
Master unit/ EC gateway unit	DeviceNet connection specification	REC-GW-DV	2-417
	CC-Link connection specification	REC-GW-CC	2-418
	CC-Link IE Field connection specification	REC-GW-CIE	2-419
	PROFIBUS-DP connection specification	REC-GW-PR	2-420
	EtherCAT connection specification	REC-GW-EC	2-421
	EtherNet/IP connection specification	REC-GW-EP	2-422
	PROFINET IO connection specification	REC-GW-PRT	2-423
EC connection unit	EC connection unit 4-axis specification	RCON-EC-4	2-424
Terminal unit	For REC	RCON-GW-TRE	2-424

System Configuration

RCON

Option

PC teaching software
(See P. 2-427)
<Model: RC/EC Software>

Option

Teaching pendant
(See P. 2-433)
<Model: TB-03><Model: TB-02>

Field network DeviceNet, CC-Link, CC-Link IE Field, EtherCAT, EtherNet/IP, PROFIBUS-DP, PROFINET IO

Supplied with GWG specification
Dummy plug
(See P. 8-120)
<Model: DP-5>

Supplied with gateway unit
System I/O connector
(See P. 8-120)
<Model: DFMC1,5/5-ST-3,5>

Option

Fan unit
(See P. 8-119)
<Model: RCON-FU>

For RC/EC Software: USB cable
For RCM-101-USB: Supplied with PC teaching software

Option

24VDC power supply
(See P. 2-429)
<Model: PSA-24>

Supplied with SCON-(RC specification)

Supplied with 200V driver unit

Dummy plug
(See P. 8-120)
<Model: DP-6>

Connection cable
(See P. 8-127)
<Model: CB-RE-CTL002>

Supplied with 24V driver unit

Drive power shutoff connector
(See P. 8-120)
<Model: DFMC1,5/2-STF-3,5>

RCON-EXT connection specification
[I/O type: RC]
(See P. 8-217)

Supplied with simple absolute unit

Connection cable
(See P. 8-123)
<Model: CB-ADPC-MPA050>

Option

Regenerative resistance unit (Note 1)
(See P. 8-120)
<Model: RESU-2/
RESUD-2>

Supplied with power supply unit

Power supply connector
(See P. 8-120)
<Model: SPCS/4-STF-7,62>

Supplied with expansion unit

Terminal connector
(See P. 8-120)
<Model: RCON-EXT-TR>

Option

Simple absolute unit
(See P. 8-106)
<Model: RCON-ABU-P
(for stepper motor)>
<Model: RCON-ABU-A
(for AC servo motor)>

Supplied with EC connection unit
Drive power shutoff connector
(See P. 2-428)
<Model: DFMC1,5/4-ST-3,5>

LSA Series

*Refer to P. 8-90 for not connectable actuators.

Connection with "24V driver unit"

RCP2/3/4/5/6 Series	RCA/2 Series	RCD Series
---------------------	--------------	------------

Connection with "EC connection unit"

EC Series *2

Connection with "200V driver unit"

(60W ~ 750W equipped actuator)
RCS2/3/4 Series
IS(D)B Series
SSPA Series
DD(A) Series
LSA Series

*Refer to P. 8-90 for not connectable actuators.

*1 The motor/encoder cable is supplied with the actuator. The motor/encoder cables differ according to the actuator type to be connected. Please see the R-unit catalog for information on whether actuators from other series can be connected, and for details on the unit configuration. Refer to P. 8-121 to purchase cable single unit.

*2: When connecting 200V specification, a DC power supply for driving motor is necessary. Refer to P. 2-402 for details.
Note 1: A 60W regenerative resistor is built into both RCON-SC and RCON-PS2. There is generally no need for regenerative resistance. However, if there is insufficient regenerative resistance, use an external regenerative resistance unit.

General Specifications

■RCON

Item		Specifications						
Power supply voltage		24VDC ±10% 200VAC ~ 230VAC ±10% (power supply unit)						
Power supply current		Differs with system configuration						
Number of axes controlled		1 ~ 16 axes (*for maximum axes, see "Maximum number of connectable axes" (P. 8-109))						
Supported encoders	24V series	Incremental (including ABZ parallel) Battery-less absolute						
	200V series	Incremental (including ABZ parallel), battery-less absolute, quasi absolute, index absolute (SCON connection specification) absolute, absolute multi-rotation						
Supported field networks		CC-Link, CC-Link IE Field, DeviceNet, EtherCAT, EtherNet/IP, PROFIBUS-DP, PROFINET IO						
Configuration units		Gateway unit, driver unit, expansion unit, EC connection unit, power supply unit, fan unit, terminal unit, simple absolute unit						
SIO interface	Teaching port	Communication method					RS485	
		Communication speed					9.6/19.2/38.4/57.6/115.2/230.4kbps	
	USB port	Communication method					USB	
		Communication speed					12Mbps	
Emergency stop/enable operation		Bulk system support with gateway unit STOP signal input, equipped with connectors capable of shutting off drive power to individual axes of each driver unit						
Data recording device		FRAM 256kb (gateway unit, 24V driver unit) SRAM 4Mb (200V driver unit)						
Data input method	Teaching port	Touch panel teaching pendant						
	USB	PC teaching software						
Calendar function	Retention function	Approx. 10 days						
	Charging time	Approx. 100 hours						
Safety category compliance		B (the safety category specification supports up to 4 external circuits)						
Protection function		Overcurrent, abnormal humidity, encoder disconnection, overload						
Preventative/predictive maintenance function		Low electrolytic capacitor capacity and low fan rotation speed						
Ambient operating temperature		0 ~ 40°C (without fan), 0 ~ 55°C (with fan) (*0 ~ 40°C for simple absolute units)						
Ambient operating humidity		5%RH ~ 85%RH (Non-condensing)						
Operating atmosphere		No corrosive gas and excessive dust						
Vibration resistance		[Frequency 10 ~ 57Hz] Amplitude: 0.075mm [Frequency 57 ~ 150Hz] Acceleration: 9.8m/s ² [XYZ directions] Sweep time: 10 minutes, Number of sweeps: 10						
Shock resistance		[Drop height 800mm] 1 corner, 3 edges, 6 faces						
Electric shock protection mechanism	24V	Class III						
	200V	Class I						
Degree of protection		IP20						
Insulation withstanding voltage		500VDC 10MΩ						
Cooling method		Natural cooling and forced cooling by fan unit (option)						
Connections between each unit		Unit connection method						
Installation/mounting method		DIN rail (35mm) mounting						
Regulations/standards	Unit name	Gateway unit	24V driver unit	200V driver unit	200V power supply unit	Simple absolute unit	SCON expansion unit	EC connection unit
	CE Marking	○	○	○	○	○	○	○
	UL	○	○	- (to be acquired)	- (to be acquired)	○	○	- (to be acquired)

■REC-GW

Item		Specifications						
Power supply voltage		24VDC ±10%						
Power supply current		Differs with system configuration						
Number of axes controlled		1 ~ 16 axes						
Supported encoders	EC connection	ELECYLINDER® connection only Incremental, battery-less absolute						
Supported field networks		CC-Link, CC-Link IE Field, DeviceNet, EtherCAT, EtherNet/IP, PROFIBUS-DP, PROFINET IO						
Configuration units		EC gateway unit, EC connection unit, terminal unit						
Data input method	Teaching port						Touch panel teaching pendant	
	USB						PC teaching software	

■ REC-GW

Item		Specifications	
Serial communication function	Teaching port	Communication method	RS485
		Communication speed	9.6/19.2/38.4/57.6/115.2/230.4Kbps
	USB port	Communication method	USB
		Communication speed	12Mbps full speed
Emergency stop/enable operation		Equipped with connectors capable of shutting off power to individual axes of the EC connection unit	
Safety category compliance		Non-compliant	
Ambient operating temperature		0 ~ 55°C	
Ambient operating humidity		5%RH ~ 85%RH (Non-condensing)	
Operating atmosphere		No corrosive gas and excessive dust	
Vibration resistance		[Frequency 10 ~ 57Hz] Amplitude: 0.075mm [Frequency 57 ~ 150Hz] Acceleration: 9.8m/s ² [XYZ directions] Sweep time: 10 minutes, Number of sweeps: 10	
Shock resistance		[Drop height 800mm] 1 corner, 3 edges, 6 faces	
Electric shock protection mechanism		Class III

Regulations/standards	Unit name	EC gateway unit	EC connection unit
	CE Marking	○	○
	UL	- (to be acquired)	- (to be acquired)

Encoder resolution

Item	Motor type	Model	Encoder type	Value [pulse/r]
EC connection unit	Stepper motor	EC	Battery-less absolute / Incremental	800
	AC servo motor		Battery-less absolute	16384

Inrush current

Unit name	Unit model	Type	Value
EC connection unit	RCON-EC-4	(For 4-axis connection)	40A

Power capacity

For R units, make sure for each unit that the calculated results for control power and motor power do not exceed the current limit value for selection calculation, based on the connection configuration. When connecting ELECYLINDER of 200V specification, select the required number of DC power supply for driving motor depending on the total motor wattage.

*The maximum number of connectable axes varies by series.

Current limit value

Item	Current limit value
Control power	9.0A or less
Motor power	37.5A or less

DC power supply for driving motor

Power supply	Max. connectable axes (per one power supply)	Max. connectable motor wattage
AC100V	6 axes	800W
AC200V	6 axes	1,600W

Power supply capacity

<Control power>

Item	Specifications			Power capacity	
Control power capacity (per unit)	Master unit (including terminal unit)	Gateway unit	Without Ethernet	0.8A	
			With Ethernet	1.0A	
		EC gateway unit		0.8A	
	EC connection unit				0.1A
	24V specification ELECYLINDER (per axis)	Without brake		0.3A	
		With brake		0.5A	
	200V specification ELECYLINDER (per axis)	Without brake		0.32A	
		With brake		1.2A	

* Calculate for the number of connected ELECYLINDER axes.

<Motor power>

Item	Actuator/connection unit				Power supply current		
	Series	Motor type	Type	When energy-saving is set		Energy-saving enabled	
				Rated current	Maximum		
Motor power capacity (per actuator axis)	24V stepper motor	EC	35P/42P/56P	Other than the below	2.3A	3.9A	1.9A
			28P	S3□/RR3□	-	-	1.9A
				RP4/GS4/GW4/TC4/TW4/RTC9/GRB10/GRB12	-	-	1.7A
			20P	GRB8	-	-	0.7A

For operation patterns where acceleration/deceleration operation is performed simultaneously on all axes, and where operating duty is 100%, motor power must be calculated at the maximum current value (if the maximum current is not listed, calculate with the rated current).

"Calculator" software can be downloaded from IAI website [free of charge](#).

1 Ethernet connector

A connector for connecting to Ethernet (selected as option for RCON).

2 Status LED

Indicates the status of the controller.

3 AUTO/MANU switch

A switch for automatic/manual operation.

4 SIO connector

A connector for connecting the teaching pendant and PC teaching software cable.

5 USB connector

A connector for connecting the PC teaching software cable.

6 System I/O connector

A connector with a serial communication line for STOP input and PSA-24. Allows for external AUTO/MANU switching input for RCON.

7 Motor power connector

Motor power +24V supply connector.

8 Control power connector

A connector for connecting control power +24V and FG.

9 Fieldbus connector/IO connector

A connector for connecting the Fieldbus connector selected for the I/O type.

EC connection unit

1 Status LED

Indicates the status of the controller.

2 Jog switch

A switch used for jog operations.

3 Brake release switch

A forced brake release switch (on NOM side during normal operation).

4 EC connector

A connector to connect to ELECYLINDER®.

5 Drive power shutoff connector

A connector that allows for drive power shutoff input for each actuator.

Touch panel teaching pendant

■ Features A teaching device equipped with functions such as position teaching, trial operation, and monitoring.

■ Model **TB-03-**□ Please contact IAI for the current supported versions.

■ Configuration

■ External dimensions

■ Specifications

Rated voltage	24VDC
Power consumption	3.6W or less (150mA or less)
Ambient operating temperature	0 ~ 40°C
Ambient operating humidity	5% - 85%RH or less (Non-condensing, No frost)
Environmental resistance	IPX0
Mass	670g (TB-03 unit only)
Charging method	Wired connection with dedicated AC adapter/controller
Wireless connection	Bluetooth 4.2 class 2

PC teaching software (RC/EC Software)

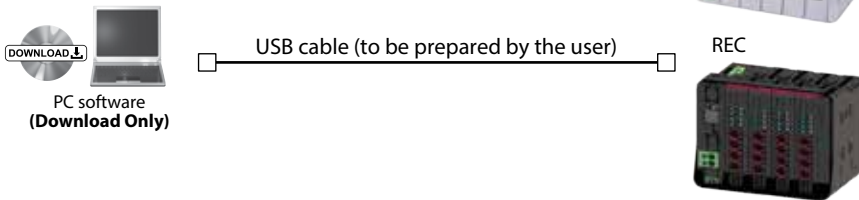

■ Features Start-up support software which comes equipped with functions such as position/program input, trial operation, and monitoring.

* Please purchase through your distributor and a download link will be sent to your valid email address.

For RCON/REC

■ Model **IA-0S** Please contact IAI for the current supported versions.

■ Configuration

Supported Windows versions: 7/10

■ Model **IA-OS-C** (with an external device communication cable + USB conversion adapter + USB cable)

Please contact IAI for the current supported versions.

■ Configuration

Supported Windows versions: 7/10

Maintenance Parts

System I/O connector

■ Overview A connector for emergency stop input, external operation mode switching input, etc.

For RCON-GW(G)

■ Model **DFMC1,5/5-ST-3,5**

Drive power shutoff connector

For EC connection unit

■ Model **DFMC1,5/4-ST-3,5(REC)**

Maintenance Parts (Cables)

When placing an order for a replacement cable, please use the model name shown below.

PSA-24

■ Model PSA-24/PSA-24L

24VDC power supply

Features

Compact

Even smaller than the conventional 24V power supply to save space.

Output data inside power supply

Connect to RCON to monitor the following items.

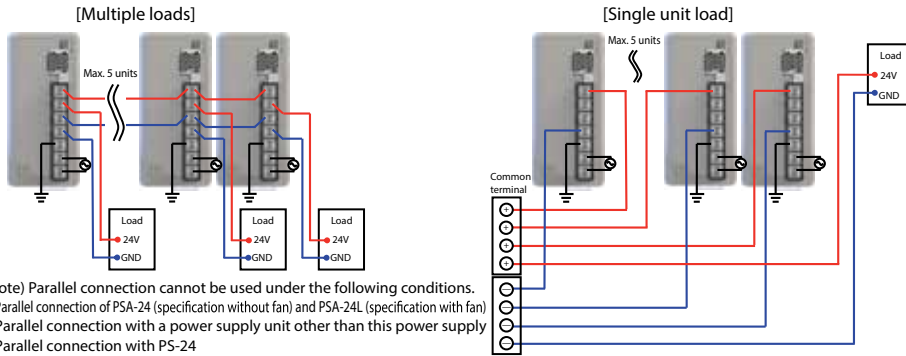

- Output voltage
- Output current
- Load factor
- Total power-on time
- Internal temperature
- Low fan speed warning

*Graph is for illustrative purposes only.

Up to 5 units can be operated in parallel

(Note) Parallel connection cannot be used under the following conditions.
 · Parallel connection of PSA-24 (specification without fan) and PSA-24L (specification with fan)
 · Parallel connection with a power supply unit other than this power supply
 · Parallel connection with PS-24

Number of parallel connected units and permissible current

No. of connected units (unit)	Rated current [A]		Peak current [A]
	PSA-24 (without fan)	PSA-24L (with fan)	PSA-24/PSA-24L
1	8.5	13.8	17.0
2	15.3	24.8	30.6
3	22.95	37.3	45.9

Models

Model	PSA-24 (without fan)	PSA-24L (with fan)
-------	----------------------	--------------------

Specifications Table

Item	Specifications		Conditions, etc.	
	PSA-24 (without fan)	PSA-24L (with fan)		
Power input voltage range	100VAC ~ 230VAC ±10%			
Power supply current	AC100V	2.5A or less	3.9A or less	Continuous rated output 204W
	AC200V	1.4A or less	1.9A or less	Continuous rated output 204W
Power frequency range	50/60Hz ±5%			
Power capacity	AC100V	250VA	390VA	Continuous rated output 204W
	AC200V	280VA	380VA	Continuous rated output 204W
Inrush current (Note 1)	AC100V	27.4A (typ)		At cold start (40°C)
	AC200V	54.8A (typ)		
Momentary power failure resistance	50Hz	20ms		
	60Hz	16ms		
Electric shock protection mechanism	Class I			
Efficiency	AC100V	86% or more		Continuous rated output 204W
	AC200V	90% or more		
Output voltage range (Note 2)	24V ±10%			
Continuous rated output	8.5A (204W)	13.8A (330W)		
Peak output	17A (408W)			
Protection function	Overcurrent protection, overheat protection, overload protection			
	Overvoltage protection, input undervoltage protection, fan rotation detection			
Ambient operating temperature	0°C ~ +55°C (with derating)			
Ambient operating humidity	5%RH ~ 85%RH		No condensation	
Operating atmosphere	No corrosive gas and excessive dust			
Vibration resistance	[Frequency 10 ~ 57Hz] Amplitude: 0.075mm			
	[Frequency 57 ~ 150Hz] Acceleration: 9.8m/s ² [XYZ directions] Sweep time: 10 minutes, Number of sweeps: 10			
Shock resistance	[Drop height 800mm] 1 corner, 3 edges, 6 faces			
Electric shock protection mechanism	Class I			
Degree of protection	Not applicable			
Generated heat	AC100V	28.6W		204W continuous rated
	AC200V	20.4W		204W continuous rated
Cooling method	Natural air cooling	Forced cooling with a fan unit		
Dielectric withstand voltage	AC input-DC output	Leakage current 10mA		3000VAC 1 min
	AC input-FG	Leakage current 10mA		2000VAC 1 min
	DC output-FG	Leakage current 25mA		500VAC 1 min
Insulation resistance	AC input-DC output	500VDC 50MΩ or higher		
	AC input-FG	500VDC 50MΩ or higher		
	DC output-FG	500VDC 50MΩ or higher		
Leakage current (Note 3)	AC100V	0.40mA (typ)		
	AC200V	0.75mA (typ)		
Safety standards	UL61010, EN61010-1			
	KC (EMC), EN55011			
Mass	805g	845g		

(Note 1) The pulse width of flowing inrush current is less than 5ms. During parallel operation, inrush current increases according to the number of units.

Check the characteristics thoroughly before selection to prevent the breaker from tripping due to inrush current.

(Note 2) In order to enable parallel operation, this power supply can vary the output voltage according to the load.

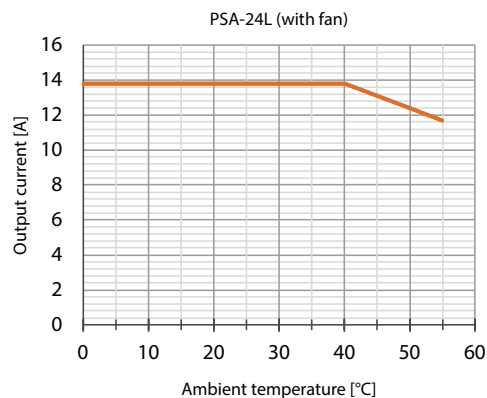

Therefore, the power supply unit is dedicated for IAI controllers. Refer to the instruction manual for the characteristics of output voltage by load.

(Note 3) Regulations for leakage current in power supply units.

 Caution	<ul style="list-style-type: none"> ● This power supply is not a rated voltage power supply. The output voltage will fluctuate under load (voltage will drop based on load factor). Connect only IAI actuators. ● Parallel operation should be limited to 5 units. Do not use power supplies other than this power supply simultaneously for parallel operation. ● Note that serial operation is not supported. ● To use multiple units in series, allow at least 10mm between each power supply for PSA-24 (without fan). No space is required between units with fans. ● The PSA-24 (without fan) power supply uses natural air cooling. Ensure there is sufficient natural convection to prevent heat from building up around the power supply. ● The housing of this product also serves to dissipate heat. Do not touch the housing after installation as it will become extremely hot and could cause burns if touched.
---	--

Derating with Ambient Temperature

Reduce the output power in accordance with the following derating curve when the ambient temperature is 40°C or higher.

Part Names

1 Fan unit

Unit connected when using with a continuous rated output of 330W (PSA-24L)

2 Fan connection unit

Fan connector connected when using with a continuous rated output of 330W

3 Fan alarm notification LED 4 Normal operation notification LED

There are two LEDs used to indicate the status of the fan and power supply

Name	Panel notation	Display color	Status	Description
Fan alarm notification LED	FAN	Orange	ON	Fan rotation speed error
			Blinking	Fan rotation speed warning
			OFF	No fan error
Normal operation notification LED	SYS	Green	ON	Normal operation
			OFF	Stopped

5 Communication connector

Connector for power supply monitoring status data via communication

6 Communication address switch

Sets the allocation of the slave address for communication when multiple power supplies are connected using multi-drop

7 Power terminal block

Connects AC power supply input, frame ground, and output voltage wires

PSA-24 (without fan)

PSA-24L (with fan)

TB-03

Touch panel teaching pendant TB-03 for both position controllers and program controllers

Features

1. Set operating conditions wirelessly

Position adjustment, operating condition configuration, and actuator operation can be performed from outside the device without connecting to ELECYLINDER® itself with a cable.

*The stop switch is enabled only for wired connections. It is disabled for wireless connections.

ELECYLINDER® can be operated wirelessly, and its wireless functions vary according to what is listed in the ELECYLINDER® model option column.
"-WL" = edit only, "-WL2" = edit + action

2. Status monitoring makes daily maintenance easier and reduces trouble recovery time

Receives wireless data transmitted constantly from ELECYLINDER® to monitor the operation status of up to 16 axes. Errors can also be troubleshooted wirelessly to reduce recovery time.

*Monitoring is possible only when connected wirelessly to ELECYLINDER®.

Status monitor screen

EC2	Servo	Travel Cnt.	52	Alarm Group	Warnin
S/N A70761788	Cur. pos.	Travel Dist.	1 m	Maintenance warning 1	
Selectable	0.00 mm	Over load Lv.	12%		

Axis name display
Can be set (changed) arbitrarily according to the application.

Status monitor
The status of the shaft can be checked, which is helpful in checking the maintenance time.

Error status monitor
Displayed when an alarm or warning has occurred. This allows troubleshooting to be performed.

Troubleshooting screen

3. Supports ELECYLINDER® and all IAI controllers

Can be connected to all controllers* with dedicated cables. Can perform the same functions and operations as the conventional teaching pendant TB-02.

*All controllers listed in the General Catalog in 2018 or later

Controller

Wired/wireless operation can be selected when selecting the ELECYLINDER® model.

Connection

● Wireless connection (ELECYLINDER® only)

● Wired connection (cable connection)

*1 A gateway unit or PLC connection unit is required to operate RCP6S and RCM-P6.

Body specifications

Power input voltage range	24VDC ±10% [supplied from controller]
Power consumption	3.6W or less
Consumption current	150mA (supplied from controller)
Ambient operating temperature	0 ~ 40°C (no condensation or freezing)
Ambient operating humidity	5% - 85%RH or less (Non-condensing, No frost)
Ambient storage temperature	-20 ~ 40°C
Vibration resistance	[10 ~ 57Hz] Amplitude: 0.075mm
Degree of protection	IPX0
Mass	670g (body) + approx. 285g (dedicated cable)
Liquid crystal	7" TFT color WVGA (800 x 480)
External memory	SD/SDHC memory card interface mounted (1GB ~ 32GB)
Charging method	Wired connection with dedicated AC adapter/controller
Language support	Japanese/English/Chinese

Wireless Function (when Connected to ELECYLINDER® Only)

Wireless connection	Bluetooth 4.2 class 2
Wireless function	Data setter/monitor function/axis operation
Operation command/stop command	Position travel/jog/inching
Max. number of connectable axes	16 axes
Operation	Battery (AB-7) operation
Wireless operating time	Max. 4 hours (battery driven)
Battery life	Cycle durability 300 times

AC Adapter Common Specifications

Power input voltage range	Single-phase 100 ~ 240VAC ±10%
Power supply current	0.4A (max.)
Consumption current	2.8A (max.)
Output voltage	5.9VDC (5.7 ~ 6.3V)
Charging time	Approx. 3 hours
Cable length	1500 ±100mm

■ Maintenance part

Battery unit: AB-7

Cautions on axis-operations using wireless connection

This device (V2.30 or later) is capable of operating the ELECYLINDER® having option code: WL2 by wireless connection. For the operation, make sure to confirm the safety according to the following items.

- When connected wirelessly, **the stop switch of the main unit does not function.**
Prepare a device or circuit that stops the operation in case of emergency.

- In ELECYLINDER® operations using wireless connection, there is a function to perform operation tests (moving to the forward and backward ends, jog and inching). However, **it is not for automatic operations.** Configure a system of the equipment according to risks of the operating environment.
- **Make sure to conduct a risk assessment according to the requirements of the standard required for the built-in equipment.** Dangerous operations, such that the machine has to be stopped automatically when control signals are not received including communication interruptions, are not allowed.
- A stop motion of axis operations via wireless connection cannot be used as the safety function of EN ISO 13849-1: 2015. It does not conform to the Safety Category B and 1 to 4 of EN ISO 13849-1: 2015.

Cautions on the use of wireless connections

- This product uses 2.4GHz band wave called an ISM band (radio frequency 2,400 to 2483.5MHz, wireless output +5dBm).
- Since this frequency band is used for various devices such as microwaves and wireless LANs, wireless communications may be interrupted due to radio disturbances.
- The use of this product is permitted in the following countries (regions) only.
In other countries (regions), it is necessary to acquire a certification in conformity with the concerned country (region).

Japan, U.S.A., Canada, EU countries, China, South Korea, Thailand, Mexico

TB-03E

ELECYLINDER® teaching pendant with dedicated power supply unit

Features

Data setting and trial operation are both possible prior to wiring and installation of the teaching pendant + system power supply unit

Conventionally...

ELECYLINDER trial operation could not be performed if there was no power to the device.

When using a teaching pendant with dedicated power supply unit...

Brake release, trial operation, and data setting are all possible prior to wiring since the teaching pendant has its own power supply unit!

		145VA (230VAC)
Output voltage		24VDC ± 10%
Load current	Standard Dust-proof/splash-proof High rigidity	Energy saving setting disabled: 3.5A rated/4.2A max Energy saving setting enabled: 2.2A rated
	Mini	2.0A max.
Output capacity		Energy saving setting disabled: 84W rated/98.4W max Energy saving setting enabled: 52.8W rated
Ambient operating temperature		0 to 40°C (no condensation or freezing)
Ambient operating humidity		5% RH ~ 85% RH (no condensation or freezing)
Ambient storage temperature		-20 to 70°C
Environment		Avoid corrosive gas and excessive dust
Elevation		1000m or less above sea level
Vibration resistance		Frequency 10-57Hz / Amplitude: 0.075mm Frequency 57-150Hz / Acceleration 9.8m/s ² XYZ directions: Sweep time: 10 minutes, Number of sweeps: 10 times
Packaging drop test		Drop height: 800mm 1 corner, 3 edges, 6 faces
Overvoltage category		II
Contamination		2
Electric shock protection class		II
Ingress protection		IP30
Mass		Approx. 740g
Cooling method		Natural air cooling

TB-03 body specifications

Power input voltage range	24VDC ±10% [supplied from controller] 5.9VDC (5.7 to 6.3V) [supplied from AC adapter]
Power consumption	3.6W or less
Consumption current	150mA (supplied from controller)
Ambient operating temperature	0 to 40°C (no condensation or freezing)
Ambient operating humidity	5% RH ~ 85% RH (no condensation or freezing)
Ambient storage temperature	-20 to 40°C
Vibration resistance	10 to 57Hz Amplitude 0.075mm
Ingress protection	IPX0
Mass	670g (body) + approx. 285g (dedicated cable)
LCD	7" TFT color WVGA (800 x 480)
External memory	SD/SDHC memory card interfaces mounted (1G to 32G)
Charging method	Wired connection with dedicated AC adapter/controller
Language support	Japanese/English/Chinese

Wireless function

TB-02E

ELECYLINDER® teaching pendant with dedicated power supply unit

Model

TB - **02E** - **C** - -

Series Type Controller connection Cable Stop switch color Power supply unit cable

02E	With actuator drive power unit for ELECYLINDER	C	For ELECYLINDER position controller*	(Blank)	Gray	0	No cable
				SWR	Red	1	100VAC power cable (2m)
						2	200VAC power cable (2m)

*In addition to the ELECYLINDER/position controller connection cable (CB-TB1-C002), an EC power supply cable (CB-ADTB-PW050-RB) is included.

AC adapter/cable

Name	TB-02E		
Power cable	None	100VAC	200VAC

Options

● Strap: STR-1

● Spiral cable: SIC-1

● Grip belt: GRP-2

■ Maintenance parts
Mounting bracket: BKT-1

Connection

Components

Power supply unit specifications

Refer to P. 2-440. Same as TB-03E.

TB-02 body specifications

Rated voltage	24VDC
Power consumption	3.6W or less (150mA or less)
Ambient operating temperature	0 to 40°C
Ambient operating humidity	5% RH ~ 85% RH (non-condensing)
Ingress Protection	IP20
Overseas standard	CE Marking
Mass	470g (TB-02 body) + 330g (5m cable)
Cable length	5m (standard cable is included and fixed to the body)

ADTB

Teaching Pendant Actuator Drive Power Supply Unit

Model

ADTB - [] - [] - [] - [] - []
 Series Compatible actuators Connection cable type Cable length Power supply unit cable TB-02 mounting bracket

EC ELECYLINDER

(Blank) No accessories
BKT Bracket included

N	No cable
EC (Note 1)	EC power connection cable
ECT (Note 2)	EC power + TB-03 composite connection cable

0	No cable
5	5m (Standard)
10 (Note 3)	10m

0	No cable
1	100VAC power cable (2m)
2	200VAC power cable (2m)

(Note) A dedicated bracket is required if mounting to TB-02.

(Note 1) EC power cable (CB-ADTB-PW050-RB or CB-ADTB-PW100-RB) is included.
 (Note 2) EC power + TB-03 connection composite cable (CB-ADTB-PWTB050 or CB-ADTB-PWTB100) is included. Select only for the TB-03.
 (Note 3) Not available for the TB-02.
